

# Up to date payment methods and Guidelines [for customers]

Owner: [AlexA\\_NeoN](#)

& Mika Neon

Last update: 17 March 2025

[Via Telegram channel](#)

[Crypto currency](#)

[Boosty \(no PayPal, sorry\)](#)

[Hipolink \(technical work for restoring PayPal is in progress\)](#)

[EasyStart \(invoice method\)](#)

[and EasyBusy \(marketplace method\) \(PayPal is working here\)](#)

Sorry, "PayPal invoice" and "Patreon" temporarily can't be used as  
payment methods via sanctions.

To fix this, we have collected information about alternatives in one place:

-----

## Via Telegram channel

Pros:

- + relative simplicity
- + telegram has gained trust of users

Cons:

- works inconsistent, time to time / customer to customer - can not work

Guide: Please, take a look at this pic-guides, it's enough informative:

-----

## Crypto currency

Pros:

- + anonymity

Cons:

- yet not found~

Tether (USDT) or TON (Telegram token) are preferred, but we can discuss other variants~

---

## Boosty (no PayPal, sorry)

### Pros:

- + customer oftenly familiar with that analog of Patreon

### Cons:

- only bank cards can be used since ~April 2024
- sometimes issues with big transactions can appear (fixable\*)

### \*Fixing possible issues:

- 1) issues with big transactions can appear - can be treated by dividing total amount by multiple 100 USD transactions.

Desc: Boosty is the russian Patreon analog made in 2019, with the ability to donate to a creator or to make a one-time-purchase post for payment.

Guide: Please, take a look at this pic-guide, it's enough informative:

Payment link: [https://boosty.to/alexa\\_neon/donate](https://boosty.to/alexa_neon/donate)

---

## Hipolink (technical work for restoring PayPal is in progress)

### Pros:

- ~~+ customer can use PayPal here?~~ (Works 50/50~)

### Cons:

- sometime issues with big transactions can appear (fixable)

Desc: Hipolink appears after Boosty stopped accepting PayPal as payment method.

Guide: Please, take a look at this pic-guides, it's enough informative:

 hipolink payment guide.jpg

### Fixing possible issues:

- 1) issues with big transactions can appear - can be treated by dividing total amount by multiple 100 USD transactions.
-

## EasyStart (invoice method) and EasyBusy (marketplace method) (PayPal is working here)

### Pros:

- + PayPal is working here
- + stability of platform

### Cons:

- invoice method: customer need to write his REAL card and cardholder info for a security checking (I don't see this info, all is confidential)
- marketplace method: you will need to make "freelance task" (see details in links below)

Desc: Easy Start - platform made in 2021, it provides the ability of payment customer-to-freelancer via email invoice. Plus, they make freelance marketplace where you can safely use PayPal as payment method~  
I collected data - lots of my colleagues use this platform as their main payment method - it's trusted~

Guide: There is, on official site, you can find full guide PayPal exactly:

[https://start.easystaff.io/pay\\_via\\_paypal](https://start.easystaff.io/pay_via_paypal)

Via invoice from me (card method):

[https://start.easystaff.io/private\\_person\\_stripe](https://start.easystaff.io/private_person_stripe)

Via freelance market:

<https://start.easystaff.io/en/helpcenter/how-to-pay-your-freelancer>

My freelancer profile (for freelance method):

<https://connect.easystaff.io/easylancer/alexaneon>

### Fixing possible issues:

**If data of card and cardholder is not real**, payment will "stuck". So you, as the customer, need to indicate REAL data of card and cardholder. It's a security requirement, and data is confidential.

### Concern about need of use REAL data:

Please be assured that your personal details are solely for processing your order. I operate with strict discretion, and your privacy is my utmost priority.

-----

## NOT LISTED IN FORM / "LAST CHANCE" METHODS

### PayPal intermediary (15% fees)

Pros:

- + Direct transfer from PayPal mail to PayPal mail

Cons:

- 15% of fees to total sum of order

Desc: Last chance if anything else didn't work~

### Russian banks transaction

Pros:

- + Direct transfer (if it's possible for you)

Cons:

- until almost all russian banks under sanctions, it works only for residents of Russia or who has friend/intermediate to process transaction

Desc: Tinkoff, Alfa, Sberbank, etc. In times like these, it makes sense to have every possible path, doesn't it?

-----

If you know about alternative payment methods - we can discuss them~
