

This bar graph compares the percentage of students who earned 16 or more credits by the end of Grade 10 during the 2022-2023 and 2023-2024 academic years. The vertical axis ranges from 0 to 100 and shows the percentage of students. The horizontal axis shows two bars for the Upper Grand District School Board and two bars for the province. The bar representing the school board in 2023-2024 shows that 81% (the same as the previous year) of students achieved this milestone, whereas the province is slightly lower at 78% (the same as the previous year). The visual aims to highlight the differences in student academic achievements in earning credits by the end of Grade 10 between the two compared groups.
