

NPGA Herdbook Instructions
Document last updated: 10/25/2022
Herdbook last updated: 1/2/2023

1. Herdbook Homepage

<https://npga-herdbook.com>

This is the homepage of the official NPGA herdbook website. In order to best use the herdbook, utilize your computer desktop or laptop as the depth of the generation views will display in non-mobile viewing and for printing purposes. In order to use herdbook you must have an active herdbook subscription, please contact the Central Office by phone to pay by credit card or mail in a check with the herdbook application form on the website. If you have a herdbook login and are having trouble logging in you can request to receive your [password here](#). If you cannot recover your account password, please email the Central Office: npga2021@gmail.com

2. Pedigree, PGCH & MCH Search

Once logged in to herdbook, you will be directed to the search page dialogue that looks like this:

Herdbook Search Page Preview

national pygmy goat association
The Official Breed Association of the Pygmy Goat

National Pygmy Goat Association Herdbook

This is an online database of Pygmy Goat pedigrees hosted by National Pygmy Goat Association Herdbook.

Follow these steps to search NPGA Pedigrees & PGCH Goats

Number of generations:	Select the number of generations you will want displayed in the pedigree. 3
Field to search:	Select Goat Name, Registration #, Breeder, Owner or Herd Prefix Tattoo. Goat Name
Search criteria:	Type a goat's name, or partial name, registration#, breeder, owner or prefix. For example, entering the name "Daisy" will find all animals whose names contain "Daisy" or search by breeder, owner or prefix will bring up those results. Use the Flexible search option so a space matches any characters. Enter goat information Flexible
Gender:	Ignore
Order by:	Registration #
Database:	Select which database to use(Pedigree or Show Wins): Pedigree
	Click on the "Search Now" button below. Search

The herdbook can be searched in 6 ways: **Goat Name, Registration #, Breeder, Owner, Herd Prefix Tattoo or Microchip # (new)**. You must use details of how they are listed on an animal's official pedigree certificate obtained from the central office. Keep the search criteria flexible for the best results.

Gender selection is now live, you can set a search to ignore or select Male (bucks/wethers) or Female (does). Search results can be ordered the following ways: Date of Birth (default) Registration #, Name, Breeder, Owner and sort by.

If you have trouble getting details to populate with the goat or details you're looking for, be sure you have selected the correct search (either Goat Name, Registration #, Breeder, Owner, Herd Prefix Tattoo or Microchip #) and correspond that to details you search for. Searching by goat name, registration or microchip number is an effective way to locate a specific animal quickly. The best way to populate all goats registered under one herdname is to search for the registered herdname only and select goat name. This will populate all goats with the search herdname.

3. Sample Search

Here is a sample search using the goat name “Riverside Oops” for the search parameters. Once the search button is clicked, the animal is populated in the search results.

[\[HOME\]](#) [\[SEARCH\]](#) [\[LOGIN\]](#) [\[ADMIN\]](#)

A few notes about the pedigree view:

1. All animal's names are hyperlinked and can be clicked on to view that animal
2. PCGH, MCH & NATL animal names are listed in **RED LETTERS** with the title before and after their names. Any animal that has special characters added or a buck that has been wethered but still has offspring will show the appropriate letter such as -W (wether) or -AI (artificially inseminated) will show directly after it's sex (M) in **green letters** in the top yellow box.
3. Search results display Sex, Date of Birth, Registration #, Microchip #, Breeder, Owner, Herd Prefix, Special Markings, Color and Sire/Dam registration numbers in the yellow box at the top.

Vertical Pedigree

Vertical Pedigree Preview

The vertical pedigree view displays an animal's sire and dam details along with a “vertical” and condensed view of their full siblings.

UPDATE 7/3/2022: a show win search has been added to search for all recorded wins and MCH wins by animal registration #. You can sort results by date or by judge name. If you don't know an animals registration # look the animal up in the [Pedigree, PGCH & MCH Search](#) by name to find that information. Take the registration # of that animal and search in the NPGA Show Records search section to find how many wins an animal has on what date by what judge.

Follow these steps to search NPGA Show Records

Field to search:	Registration # ▾
Search criteria:	Type a goat registration #. Flexible ▾
Gender:	Ignore ▾
Order by:	Date of Show ▾
Database:	Select which database to use (Recorded Wins or Master Wins): Recorded Wins ▾
	Click on the "Search Now" button below. Search

5. Herdbook Updates NEW

3 Requested Updates to Herdbook as of 10/25/22:

1. Linked Show Wins in Pedigree

The Recorded and MCH Wins are now hyperlinked in the Pedigree view of every animal. When these links are clicked, it will open a new window with corresponding Recorded Wins or MCH Wins of the animal. Please note, only animals with show records will populate show results.

2. Owner Returning Missing Results

The Owner search field has been updated to reflect ownership based on 3 parameters. If Owner is selected in the search dialogue, it will return results based on the following example: Shanna Breeding 1. If the owner name is Shanna Breeding in the owner field of the database 2. If the owner name is blank in the field of the database but is listed as the Breeder name (Shanna Breeding)

or 3. If the animal was bred by a different breeder but the Owner name is Shanna Breeding in the field of the database.

3. DOB Dates Newest to Oldest

UPDATE 10/25/2022: Animal results are now set to descend according to newest year 2022 to oldest. So newest animals are the first search results and oldest animals are last.

Note: due to the latter recent upgrades, the unique color backgrounds on duplicate animals in a pedigree is no longer on display to avoid confusion moving forward.
