🚀 About the Project 🚀

Meet Krumpepe - long-lost relative of television's Krumm and Pepe the Frog - designed as a Pump.Fun Memecoin during the Political Season of 2024 by Artist and Solo-Dev Twisted Meta. Since $KRUMPE's conception just over one year ago, Krumpepe has continued to evolve both in potential and in popularity, culminating in the ultimate Krumpepe 2.0 Re-Launch on 9/11/2025 and beyond!

As part of the Twisted Metaverse Ecosystem, Krumpepe 2.0 will be the Official Community Token for Twisties - with the ambition of integrating the coin into other Projects and Products, including Krumpepe Merch, Premium Content and More as the Project continues to gain traction.

As a Solo-Dev and Community-Driven Token, Community Engagement will be essential in the success of the Project in the form of Raids, Viral Content Creation and Social Media Interactions - Engagement and Hodling will both be incentivized with rewards, in addition to airdrops, giveaways, exclusives and other benefits.

Staking or Locking, in addition to Games and other Content are Long-Term Goals based on the success of the Project, in addition to other ambitions. Krumpetriots Unite!!!

🎮 About the Dev

Twisted Meta is a veteran Artist/Game Dev focused on Crypto, Web3 and Game Development - Creator of Holly Doges NFT, Krumpepe, RCA NFT's and More!!!
