

Directions:

- Choose **3 sources** from the [AI & Technology Resources](#) document from the “Additional Reading” column for your chosen question.
- Read / view each source carefully.
- Complete a row on the chart below for each source used. Use the [verb list](#) to help you choose verbs for the “Justification” column.

Research Question:				
#	SOURCE List the title & author. (No author? Record other identifying information, such as the editor or source title.)	Content TYPE (select one)	SUMMARY Briefly summarize the main ideas / claims in the source. (2-3 <u>sentences</u>)	JUSTIFICATION Explain WHY you are choosing to use this source. HOW does the information in this resource connect to the research question ? WHY is this a good source? (2-3 <u>sentences</u>)
Ex.	“Artificial Intelligence for a Social World” by Justine Cassell	<input type="checkbox"/> Book <input checked="" type="checkbox"/> Magazine <input type="checkbox"/> Newspaper <input type="checkbox"/> Video	In this article, Cassell argues that rather than designing AI to be autonomous from humans, scientists should focus more on the interdependence between humans and technology. Socially aware AI can adapt to the language and social norms of the person interacting with the AI in order to develop a stronger rapport and ultimately improve socialization.	Cassell describes the different experiments she has done with artificial intelligence. She explains the positive social impact of AI by summarizing the outcomes of her research. Cassell is a professor at Carnegie Mellon University and works at the Human-Computer Interaction Institute.
