## Software Engineer

### Experiences

---

#### **E-commerce - 5+ years experience**

Across various platforms, I have established and overseen the operations of multiple online stores, while also crafting their unique visual branding and managing their social media presence.

#### **HTML & CSS - 5+ years experience**

I gained my initial front-end development experience while managing e-commerce operations, focusing on website optimization and user experience. I later pursued further training to expand my skills.

#### **React - 3+ years experience**

During my time at Technigo, I actively engaged in various React projects, gaining invaluable hands-on experience and refining my skills in web development. Through collaborative efforts, I contributed to the successful execution of projects, further deepening my understanding of React and its applications.

## Tech

- HTML
- CSS
- JavaScript
- TypeScript
- React
- Redux
- Google Cloud
- Node.js
- MongoDB
- Tailwind CSS
- Bootstrap
- Web Accessibility
- Next.js

*HTML, CSS, JavaScript, API, React, Redux, swr, MongoDB, MongoDB Atlas, Ant Design, Netlify, Google Cloud Run, Playwright Test, Github*

## Highlighted Projects

---

### Software Developer

PokeYAY - 2023

I built a web application where users can sign up and post listings for Pokémon they want to trade.

The application uses an extensive database of Pokémon imported from various data sources. Users can create a profile, and once logged in, they can post their own listings for Pokémon they're interested in trading, as well as browse and search listings created by others.

The application is hosted on Netlify (front-end) and Google Cloud Run (back-end), deployed via GitHub Actions, and the data is stored in MongoDB Atlas.

### Software Developer

The Maze - 2022

Together with a classmate I built a browser game designed to be played either on desktop, tablet or mobile. Graphics rendered using AI bring this text based adventure to life.

The game is hosted on Netlify and is deployed through Github Actions.

*External APIs, CSS, HTML, JavaScript, React, Redux, API, Responsive Design, styled components, Lottie, Netlify, Github*

## Work Experience

---

2024 - Current

### Software developer

QA.tech

I work with the website, focusing on front-end development.

*Wordpress, React, TypeScript, Supabase*

2024

### Software developer

Clutry via Abrovinc

I designed and implemented the commercial website of Clutry - a B2B platform for equipment management. All design components were built in Storybook JS and the website used NextJS.

*Figma, Git, GitHub, React, NextJS*

2023

### Software Developer

PokeYAY

I built a web application where the users can sign up and post listings for Pokemons they want to trade. The application uses an extensive database of Pokémon imported from various data sources. The users can sign up and create a profile, and once logged in they can search, list, and submit their own suggested trades.

*HTML, CSS, JavaScript, API, React, Redux, swr, MongoDB, MongoDB Atlas, Ant Design, Netlify, Google Cloud Run, Playwright Test, Github*

2022

### Software Developer

The Maze

Together with a classmate I built a browser game, designed to be played either on desktop, tablet, or mobile.

*External APIs, CSS, HTML, JavaScript, React, Redux, API, Responsive Design, styled components, Lottie, Netlify, GitHub*

2022

### Software Developer

Never Ending Post It

I created a to-do list one pager where users can add, check off, and delete tasks.

*HTML, CSS, React, Redux, styled components, Netlify*

2022

### Software Developer

Cloud Weather

I developed a web app where users can see the weather forecast for today, and five days ahead. The colour scheme changes according to the current weather conditions.

*HTML, CSS, React, Redux, styled components, Netlify*

2010 - 2016

**Web Developer (and other roles)**

Suteki (2010-2013) , reHARAJUKU (2013-2016)

I established and launched an online store tailored to Japanese pop culture enthusiasts, followed by the establishment of a second e-commerce venture targeting international markets.

*HTML, CSS, Photoshop, Hootsuite, Facebook Ads, Google Adwords, SEO*

**Education**

---

2022-2023

**Technigo**

Bootcamp for modern front-end development for people with experience with development. Learned modern web development techniques such as React, Redux, nodejs, MongoDB.

2019

**Full Stack Developer Course**

Code Institute

Web development course primarily focused on Bootstrap, jQuery, and vanilla JavaScript.

2017

**Garment Creation**

Bunka Fashion College

I studied sewing and handicraft techniques, design theory, pattern making, fashion illustration, fashion history as well as fabrics and material theory.

2016

**Japanese (Advanced)**

Bunka Institute of Language

Advanced Japanese course to prepare for studying at Bunka Fashion College, where classes are taught in Japanese.

2013 - 2014

**Japanese (Beginner-Intermediate)**

Shibuya Gaigo Gakuin

I studied the Japanese language at Shibuya Gaigo Gakuin.
