Request 1: Mechanisms

Stakeholder 1	Stakeholder 2	Mechanism	Description
Module Creator	Safe User	Marketplace	Module creators will deploy their modules to Safe{core} and Safe users will purchase these modules
Module Creator	Curator (\$SAFE holder)	Token weighted curation	Curators can stake on modules in order to earn a share of the revenue that modules generate. Creators set the % of revenue that will be shared with their curators. Seniority of curation is also rewarded (via a time-based multiplier), such that the most profitable curators display sound judgment, and are early
Curator	Safe user	Token weighted curation	Higher amount of tokens staked on a module gives a signal that curators believe this module is of high quality and has the potential to generate meaningful revenues
Councillor	Module	Delisting	Module creators found guilty of listing

	Creator		malicious modules (through social consensus and/or Kleros Court) will have modules removed from the marketplace
Councillor	Curator	Slashing	In the event of a delisting from the marketplace due to a malicious module, all curators staked on that module are slashed
Treasury/governance	Module Creator / Curator	Grants	Grants may be given to Creators and Curators to help encourage the activity of listing and curation in the marketplace

Note: the legal risk associated with the real yield in ETH/stablecoins being paid to curators is minimized due to the fact that they have to use sound judgment and do real 'work' in order to earn a return. These mechanisms serve as strong legal risk mitigation for the \$SAFE token against it being deemed a security.

Request 2: Examples of projects

Mechanism	Project
Stake to curate	The Graph - has a sophisticated system of indexers and delegators which can be likened to module creators and curators
Nominated Proof of Stake (NPoS)	Polkadot relay chain - a variant of PoS wherein delegators to validators are also slashed along with the validator they have delegated to should that occur. Creates a curation mechanism
Grants	Any big ecosystem

Any questions and comments on this will be addressed in the governance thread.
