²Faculty or Department Name, University Name, City and Postal Code, Country

Abstract. You should leave 8 mm of space above the abstract and 10 mm after the abstract. The heading Abstract should be typed in bold 9-point Arial. The body of the abstract should be typed in normal 9-point Times in a single paragraph, immediately following the heading. The text should be set to 1 line spacing. The abstract should be centred across the page, indented 17 mm from the left and right page margins and justified. It should not normally exceed 200 words.

1 Introduction

Use 170 x 250 mm paper size (W x H mm). The margins for top, bottom, left, and right are 24, 16, 20, and 20 mm, respectively. The final printed area will be 130 x 210 mm. Do not add any page numbers. The title is set in bold 16-point Arial, justified. The first letter of the title should be capitalised with the rest in lower case. You should leave 22 mm of space above the title and 6 mm after the title.

The style for the names is First Name and Middle Name typed in italic 10-point Times, then Last Name, typed in 10-point Times, with a comma after all except the last author, which is separated by comma + “and”. Do not use academic titles. Affiliations of authors should be typed in 9-point Times. They should be preceded by a numerical superscript corresponding to the same superscript after the name of the author concerned. Please ensure that affiliations are as full and complete as possible and include the country.

2 Materials and Methods

¹ Corresponding author: author@ub.ac.id

2.1 Subsection

The text of your paper should be formatted with 10-point Times, Times Roman or Times New Roman. The text should be set to single line spacing and paragraphs should be justified.

The first paragraph after a section or subsection should not be indented; subsequent paragraphs should be indented by 5 mm.

The use of sections to divide the text of the paper is optional and left as a decision for the author. Where the author wishes to divide the paper into sections the formatting shown in Table 1 should be used.

Table 1. Formatting sections, subsections, and subsubsections.

	Font	Spacing	numbering
Section	12-point Arial bold	6 mm before 3 mm after	1, 2, 3, etc.
subsection	10-point Arial bold	6 mm before 3 mm after	1.1, 1.2, 1.3, etc.
subsubsection	10-point <i>Arial Italic</i>	6 mm before 3 mm after	1.1.1, 1.1.2, 1.1.3, etc.

2.2 Subsection

2.2.1 Subsubsection

You are free to use colour illustrations for the online version of the proceedings, but any print version will be printed in black and white unless special arrangements have been made with the conference organiser. Please check whether or not this is the case. If the print version will be black and white only, you should check your figure captions carefully and remove any reference to colour in the illustration and text. In addition, some colour figures will degrade or suffer loss of information when converted to black and white, and this should be considered when preparing them.

2.2.2 Subsubsection

Equations should be centred and should be numbered with the number on the right-hand side.

$$T_s(l,t) = T_g(l,t)$$

(1)

$$T_s(l,t) = T_g(l,t) T_b(x) \rightarrow -\beta, t = 0$$

(2)

Use italics for variables (*u*) and bold (**u**) for vectors. The order for brackets should be {[()]} , except where brackets have special significance.

3 Results and discussion

Figures and tables, as originals of good quality and well contrasted, are to be in their final form, ready for reproduction, pasted in the appropriate place in the text. Try to ensure that the size of the text in your figures is approximately the same size as the main text (10 point). Try to ensure that lines are no thinner than 0.25 point. Captions should be typed in 9-point Times. They should be centred above the tables and flush left beneath the figures.

Place the figure as close as possible after the point where it is first referenced in the text. If there is a large number of figures and tables, it might be necessary to place some before their text citation. The example of figure format is in the Figure 1. The example of table format is in the Table 2.

Fig. 1. Title of the figure.

Table 2. Effects of several treatments on variables of laying hens¹.

Variables ²	Treatments				P value
	T0	T1	T2	T3	
FI (g/day)	110.68 ± 0.22	110.88 ± 0.28	110.28 ± 0.56	110.00 ± 1.02	0.185
HDP (%)	80.56 ± 1.24 ^a	88.36 ± 1.36 ^b	83.04 ± 1.71 ^{ab}	80.43 ± 1.89 ^a	0.049
EW (g/egg)	63.91 ± 5.95	64.39 ± 6.03	64.35 ± 6.46	64.83 ± 4.54	0.894
FCR	2.90 ± 0.90 ^a	2.48 ± 0.10 ^b	2.87 ± 0.21 ^a	2.89 ± 0.29 ^a	0.011

¹Data were presented as mean ± standard deviation from five replicates with each replicates consisted of five laying hens

²FI: feed intake, HDP: hen day production, EW: egg weight, FCR: feed conversion ratio

^{a-c}Uncommon superscript indicates a significant difference (*P* < 0.05)

4 Conclusion

Conclusion should underline the main result and significance of study.

The acknowledgements should be typed in 9-point Times, without title.

References

Online references will be linked to their original source, only if possible. To enable this linking extra care should be taken when preparing reference lists.

References should be cited in the text by placing sequential numbers in brackets (for example, [1], [2, 5], [8-10]). They should be numbered in the order in which they are cited. A complete reference should provide enough information to locate the article. References to printed journal articles should typically contain:

- The authors, in the form: initials of the first names followed by last name (only the first letter capitalized with full stops after the initials),
- The journal title (abbreviated),
- The volume number (bold type),
- The article number or the page numbers,
- The year of publication (in brackets).
