Black Cumin Oil

Black Cumin Seed Organic Carrier Oil is extracted through cold pressing to preserve its natural composition, yielding a liquid that ranges in color from pale amber with a faint greenish tint to dark amber. Known for its skin-conditioning properties, this luxurious oil is commonly used in formulations designed to hydrate, soothe, and balance the skin.

As an ingredient in personal care products, Black Cumin Seed Oil penetrates the skin and leaves a protective barrier, while in haircare, it promotes moisture and enhances manageability. Its unique aromatic profile—earthy with mildly spicy undertones—adds a distinct sensory element to formulations without overwhelming other ingredients.

Certified Organic by the USDA and Quality Assurance International, the organic variety of our Black Cumin Seed Carrier Oil is cultivated, processed, and produced in an environmentally and ethically sustainable manner. When you purchase this product, you are supporting liveable wages for farmers, environmental preservation, wildlife diversity, and energy-efficient farming methods. Enrich the efficacy and marketability of your organic formulations with Black Cumin Seed Organic Carrier Oil.

Botanical Name: *Nigella sativa*

Origin: Turkey

Extraction Method: Cold Pressed

Plant Part: Seeds

Color & Consistency: Ranges from pale amber with a greenish tint to dark amber; medium viscosity

Aromatic Profile: Characteristic musty scent with mildly spicy nuances

Blends With: Suitable for combining with a variety of essential oils and other organic carrier oils to enhance formulation performance

Recommended Use: Best suited for formulations requiring organic ingredients, such as skincare, haircare, and massage products

BENEFITS

Certified Organic Purity: Cold pressed from the seeds of organically grown *Nigella sativa* flower, this variety of Black Cumin Seed Oil is free from synthetic pesticides, fertilizers, or GMOs. Our organic carrier oils support organic formulation requirements for skincare, haircare, and personal care applications.

Nutrient-Rich Composition: Naturally abundant in essential fatty acids, including linoleic acid, Black Cumin Seed Organic Oil supports skin hydration and nourishment. Its balanced profile makes it suitable for various formulations targeting skin conditioning and scalp care.

Versatile in Formulations: With a medium viscosity and a characteristic musty, mildly spicy aroma, Black Cumin Seed Organic Carrier Oil blends well with other carrier oils and essential oils. It integrates seamlessly into face and body oils, scalp treatments, and emulsions.

Supports Product Integrity: As an ingredient, Organic Black Cumin Seed Oil contributes to the longevity of cosmetic formulations by supporting stability and maintaining performance over time. Its inherent antioxidant properties help sustain product efficacy in a range of applications.

DIRECTIONS AND USES

- **Skincare Formulations:** Use at 1% to 10% in emulsions such as creams and lotions for added hydration and skin-conditioning benefits. It can also be included in facial and body oils at higher concentrations, depending on the desired texture and sensory experience.
- **Massage and Body Care:** Ideal for use as a base oil in massage blends, either on its own or combined with other carrier oils, to provide a smooth glide and a nourishing after-feel.
- **Hair and Scalp Treatments:** Incorporate at 1% to 5% in conditioners, scalp oils, or masks to support hair softness and improve manageability.
