

Welcome to the Oil City High School Graduation Project.

This site provides all requirements and forms students need to complete the project during their four years at Oil City High School. The project focuses on career interests, helping students graduate with a clear plan for the future.

Each student will work with their activity period teacher to submit verification of completed documents, answer questions, and meet weekly with students to review grades and project work.

- PM VTC students will report to their graduation project teacher each Friday for the first 9-weeks of school. After that, students will meet with their teacher on an as needed basis.

New students begin the project at the grade level in which they enroll. For example, a sophomore starts with sophomore requirements. Seniors entering OCHS must complete two eight-hour job shadows along with the paper and presentation.

For questions, contact your advisors first. If they cannot help, submit your question here and you will receive a reply by email.

Requirements by Grade

Freshmen

- 4 hours of community service and Community Service Log
