## Children

- deprived of an important food adjunct if the villagers cease making gur 122
- getting addicted to tobacco 46
- getting good exercise by grinding flour 8
- in Asia, shorter (on average) than their counterparts in sub-Saharan Africa 74
- influenced by their parents' habits and way of life 112
- in low- and middle-income countries 74
- learning to use "head, heart and hand" via socially useful productive physical activity 50
- provided with a playground in an ideal village 42
- treated by Gandhi with naturopathy only 69
- who are less than five years old 74, 107-108, 113-114
- in rural areas *c.* 50% more likely to die than their urban counterparts 153
- wasting due to undernutrition 154
- with
  - dysentery 106
  - genetic disorders 114
  - obesity 130, 154
  - pneumonia 51
  - pulmonary tuberculosis 96
  - repeated bouts of diarrhea 108
  - worms 74-75

## [Village, Villages]

continuing (in the 1930s), or else ceasing, to produce gur for their own consumption 122

-commune movement (Gramdan) 49

community-monitored health services 66

developed economically and socially in a transparent way promoted by Gram Sabha 64

dinner for 98 people, planned by Gandhi (list of ingredients) 43

dirty 30-31

epidemic-stricken 32, 56, 59, 154

farmers' clubs (Kisan Vikas Manch) 65

governed by panchayats with the Gram Sabha 64

in need nowadays of

- robust health systems 89
- training in modern-technology-based rural wage-labour skills 151

health, nutrition and sanitation committee(s) 64, 66-67

health problems studied epidemiologically by Ahbay and Rani Bang 51

in a remote tribal district, Gadchiroli, in central India 51

in Wardha District, Maharashtra 63-67

-industries 41, (64)

- research centre in Wardha 79

-level environmental management, biological control, health education etc. 98

libraries of health-education material for adolescents 66

lived in and studied by Abhay Bang in his teens and later as a doctor 51

model 27, 41-42, 64

nature-clinic set up in 1946 by Gandhi 32

nutri-smart 124

overall development of, 67

-panchayat(s): 41, 64-67, 89

partnership with district health system etc. 66

plague-affected 21, 155-156

plagued with health problems nowadays 54

producing and eating nutritious vegetables 79

regarded by Gandhi as

- basic institution of participatory democracy 64
- best place to study economics 49
- capable of producing plenty of fresh vegetables 124
- dependent on handicrafts for viability 142
- fatally endangered by urbanization 141-142
- free (potentially) of all illnesses with no need for doctors, hakims or vaidyas 71
- lacking access to urban-type medical facilities 37
- needing to be educated about health and hygiene 105
- potential "republics" in their own right 64
- requiring service "not after the manner of the West, but ... of the East" 69
- supplying nourishing vegetables to Gandhi and his colleagues at Wardha 79
- well suited to his kind of nature-cure health-care 34, (70)
- the soul of India 3, (41), (54), (99)

[Village, Villages]

- seeking
  - better health-status via collective action 65
  - integrated development by converting VHNSC platform to Village Development Committee as an arm of Gram Panchayat 65
  - self-reliant, self-sufficient 41-42
  - shunned by most Indian doctor-scientists 54
  - specific health plan 66
  - subject to malaria if stagnant water is nearby 41, 102
  - subjected by Sushila Nayyar in 1938 to a successful anti-cholera drive 37
  - thronged in order to hear an address in 1925 by Gandhi 62
  - water-tank quality(in 1930s)42
- with
  - a blind man fasting in 1947 in order to be able to contribute to Bihar Relief Fund 104
  - a free maternity home and dispensary in 1945 111
  - adolescent girls' groups (KishoriPanchayat) 65
  - bioenvironmental approach to preventive control of malaria 102
  - food security due to producing their own food and
    - marketing only the excess 127
    - not exporting it 120
  - larvivorous fish (eating mosquito larvae)
    - in domestic tanks in Gujarat 103
    - in wells in Karnataka 103
  - medicinal herbs in the fields 71
  - messages of cleanliness written on the houses 102
  - minimal reliance on chemical insecticides 102
  - tuberculosis fatalities in the 1920s 91
  - yoga camps and clinical examination of 'under-five' children 114
- women,
  - afflicted by their men's drinking habits, and therefore protesting *enmasse*52
  - pregnant, taught low-cost nutrition recipes based on locally available foods 114
  - self-help groups 65
  - undertaking sanitization 31

Water

-borne diseases vii, 40, 105-109, etc.

breeding-ground(s), especially if stagnant, of mosquitoes causing malaria 2, 41, 97,

created by water-resource-development projects, urbanization and industrialization

98

filled in and leveled 98-99

carried by Abhay Bang as a young teenager in a village 50

clean(enough to drink for good health)

a major factor in reducing incidence of diarrhea, environmental enteric dysfunction,

etc. 74-75, 89, 105

supplied by local waterworks in an ideal Gandhian village 42

chlorinated (for tackling epidemics of cholera and other diarrheal diseases) 106, 108

consumed by Gandhi with a little lime juice during his fasts 125

discussed in Gandhi's book *Key to Health* 95, 130

-drainage systems poor in the 19th century 100

hot, with honey and some lemon, a nourishing drink according to Gandhi 124

impure,

drunk, perforce, by millions of people (according to Gandhi) due to lack of

infrastructure or resources 105

responsible, according to Gandhi, for many of the diseases suffered by villagers 42

in old-fashioned *kaccha* tanks, unfit for drinking and ideal for mosquito-breeding 100

in Matheran (a hill station), 'hard' and thus disagreeable (for drinking) to Gandhi 14

in modern tanks, wells etc. stocked with larvivorous fishes 99

[Water]

medical uses of, (*see also* 'Hydrotherapy')

for treating diarrhea or fever (by drinking rice water or boiled water) 32

in curative treatment(s) via external application (sometimes experimental) 5

of constipation

with bandage on the abdomen moistened with clean earth and cold

water 7

with cold-water hip baths 7

of Kasturba's grave illness, cured gradually at Phoenix Farm 31-32

of pleurisy (with tepid water, etc., albeit with merely partial success) 8

neither heated nor cooled (in best Gandhian nature-cure) by use of electricity 32

polluted, studied by ICMR-National Institute for

Cholera & Enteric Diseases 143,

Research in Environmental Health 143, 154

potable, of good quality, important according to Gandhi 105

quality of, explored by ICMR-National Institute of Cholera and Enteric Diseases 108

regarded by Gandhi as one of

five "powers" or "elements" or nature-cure "agencies of Nature" (the other four being earth, ether, fire and wind) 34, 71, 154

three chief kinds of food (the other two being air and grains) 133

stored uncovered 108
