Robert W Malone, MD
@RWMaloneMD

This is key to understanding "what the heck is going on". Apparently in Israel, I am told by Israeli scientist, the agreement between Pfizer and the government is that no adverse events from the vax are to be disclosed for a minimum of 10 years.

Jan Kowalski Bunga  @JanKowBunga · 6h

12-Year-Old Child Dies Two Days After Taking Pfizer Vaccine in Germany - Officials Pull Back on Mandatory Shots for Children

[thegatewaypundit.com/2021/11/12-year-old-child](https://thegatewaypundit.com/2021/11/12-year-old-child-dies-two-days-after-taking-pfizer-vaccine-in-germany-officials-pull-back-on-mandatory-shots-for-children/)

12-Year-Old Child Dies Two Days After Taking Pfizer Vaccine in Germany - Officials Pull Back on Mandatory Shots for Children

The district of Cuxhaven, Germany confirmed on Wednesday, November 3, 2021, that a 12-year-old child died two days after taking the Pfizer vaccine. Police are investigating...

Needs an explanation 📵

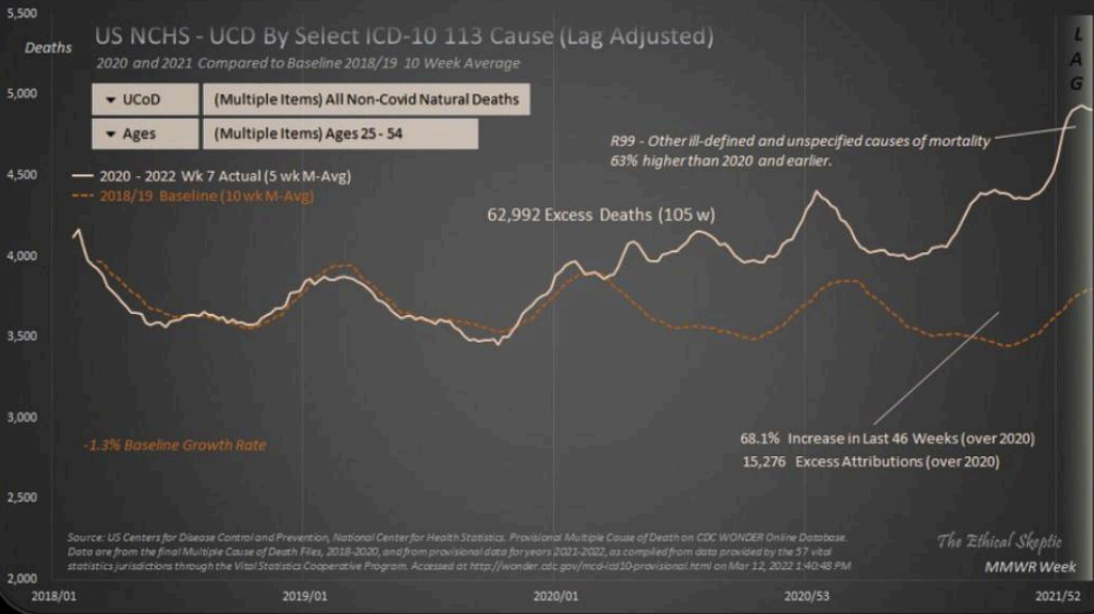

Ethical Skeptic ☀️ @EthicalSkeptic · Mar 14

I sorted and parsed 730 types of death in order to assemble this profile of 25 - 34 year olds - and the ultimate death codes which were feeding this 2021/22 rise.

If you are at the CDC and you have been watching this curve, it is time to step up. The universe is watching...

Military Adverse Events from the Covid jabs, out of DMED (Defense Medical Epidemiology Database), Jan 24, '22 Sen Johnson hearing with 3 military whistleblowers, all Doctors:

- ALL Diseases - 1200% increase
- Bells Palsy - 291% increase
- Hypertension - 2,181% increase
- Diseases of the nervous system - 1,048% increase
- Malignant neoplasms of esophagus - 894% increase
- Multiple sclerosis - 680% increase
- Malignant neoplasms of digestive organs - 624% increase
- Guillain-Barre syndrome - 551% increase
- Breast cancer - 487% increase
- Demyelinating - 487% increase
- Malignant neoplasms of thyroid and other endocrine glands - 474% increase
- Female infertility - 472% increase
- Pulmonary embolism - 468% increase
- Migraines - 452% increase
- Ovarian dysfunction - 437% increase
- Testicular cancer - 369% increase
- Tachycardia - 302% increase
- Neurological disorders - 1000% increase
- Cancer - 300% increase
- Miscarriages - 279% increase

Project SALUS (military) data (Sept. '21):
71% new Covid cases are FULLY vaxxed
60% Covid hospitalizations are FULLY vaxxed

Quote: "...and acute disease across all categories in the preceding years, 5 years leading up to the vaccination year was 1.7 million. They introduced and mandated a Covid-19 vaccine for our US military when they had only lost 12 servicemembers total to the disease; and in the 10 months of 2021 after that, it jumped from 1.7 million (all diseases) to darn near 22 million - that was a 20 million increase!!"

Fully vaccinated.

 **Rep. Sean Casten** ✓
@RepCasten

May 2021

CYMI: All Illinoisans 12 years and older are eligible for the vaccine. They are safe, effective, and key to our path back to normalcy. Everyone in my family – including my 14-year-old daughter – has started their vaccination process.

Peter A. McCullough, MD,... · 2d

Proper use of VAERS would have shut down program for **excess mortality** before Feb 1 2021. Program sponsors (CDC/FDA) recklessly continued it without risk mitigation. Will be culpable upon investigation and justice phases of pandemic. #courageousdiscourse

The billboard features a black background with white text. The text reads: "The death safety signal in VAERS was triggered long ago. Why didn't anyone at the CDC notice?" Below the main text, there is smaller text: "Filed for the Vaccine Adverse Event Reporting System (VAERS)".

Ed Free Thinker & Oracle
@DowdEdward

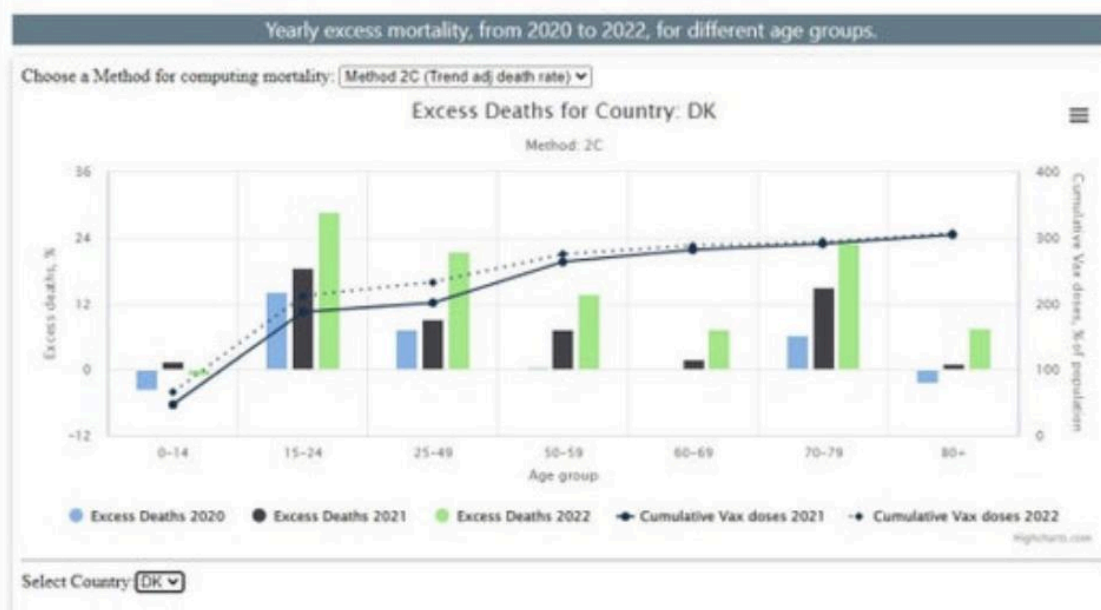

Denmark banned vaccines for under 50 in September. Below is excess mortality that we calculated...it's a disaster. Why are the US health authorities doubling down? It's a cover up and a crime at this point.

The screenshot shows a data visualization interface with several charts. The main chart is a bar chart comparing excess mortality across age groups (0-14, 15-24, 25-49, 50-59, 60-69, 70-79, 80+) for the years 2020, 2021, and 2022. It also includes a line chart for cumulative vaccine doses for 2021 and 2022. The interface includes a dropdown menu for 'Method 2C (Trend adj death rate)' and a 'Select Country: DK' dropdown.

5:33 PM · 01 Jan 23

Excess Mortality. Age-group comparison.

The following chart shows the analysis of excess mortality for 2020, 2021 and 2022, for different age groups. The user can specify the European country and the method for estimating excess mortality. It should be noted that some countries do not provide either the Covid-19 vaccination data or weekly deaths data to Eurostat, such as for example Germany.

What is Sads? Healthy young people dying from Sudden Adult Death Syndrome

T Jun, 2022 05:32 PM

Young people are being urged to get their hearts checked. Photo / 123RF

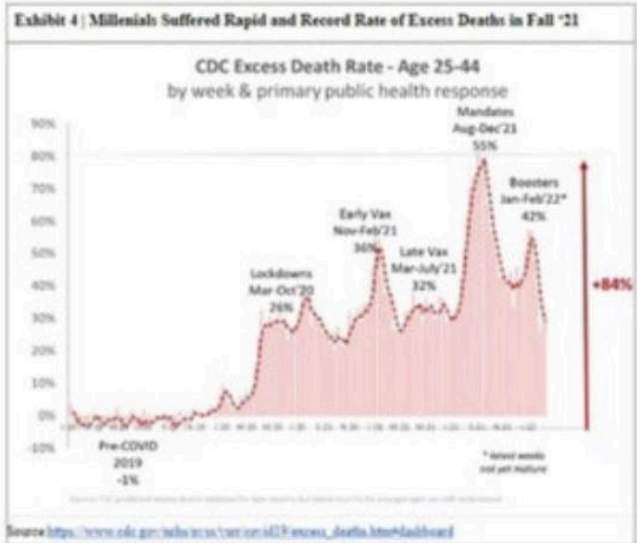

news.com.au
By: Frank Chung news.com.au

Young people with a particular family history are being urged to get their hearts screened even if they are fit and healthy, as they could be at risk of Sudden Adult Death Syndrome.

Edward Dowd ✓
@EdwardDowd · 03/10/2022

The millennial generation experienced 61k excess death in the second half of 2021. That is a Vietnam War event. Death by government mandates...we call this democide.

Robert W Malone, MD ✓ @RWMaloneMD · 3h

☆

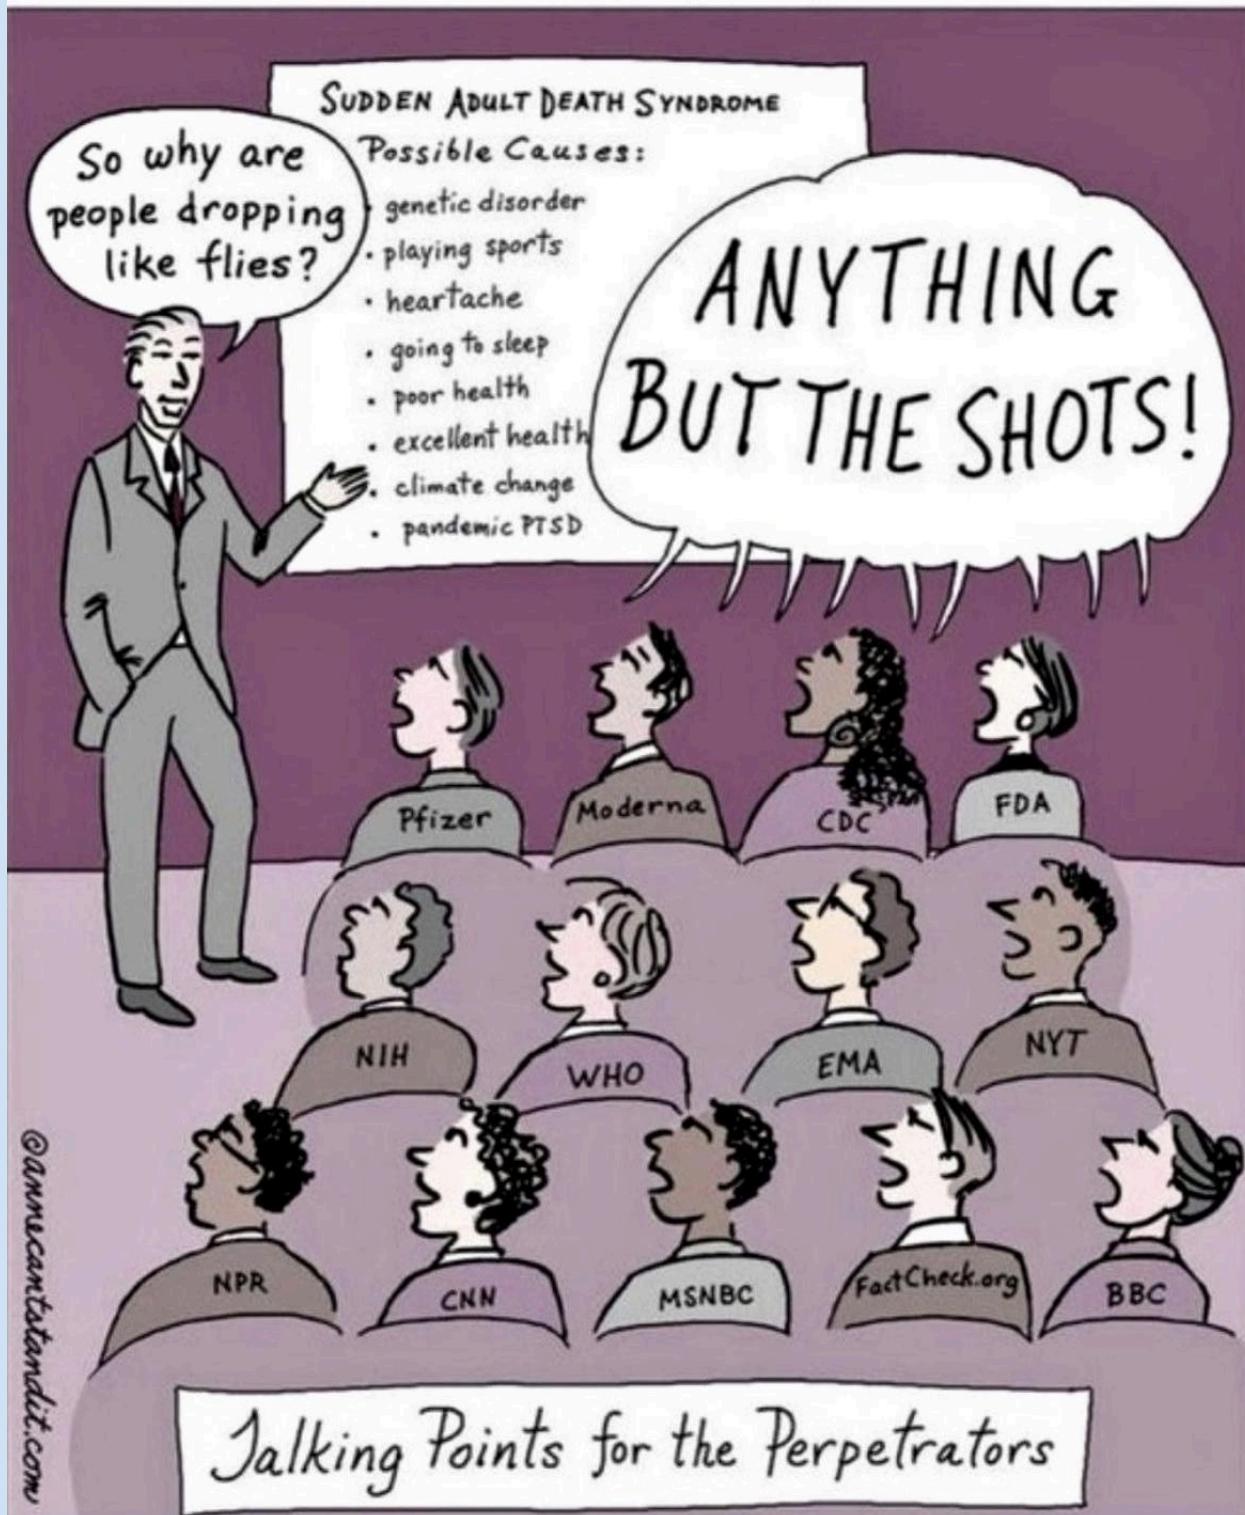

Yup, I live on Maui. We only have ONE hospital! I've taken care of 3 men now who have GBS after vax (Guillain-Barré syndrome) 4 teenage boys with myocarditis (got vax to play sports) 1 lady had to cut off her leg because of clots. 13yo Bell's palsy after shot. 7yo with seizures after clots. Covid + patient with 3x booster. 2 ladies with spontaneous abortions after vax. 1 mid 30s women with myocarditis and pericarditis ... the list goes on and one... not to mention all the Covid patients who've been killed by Remdesivir. And this is a small 240 bed hospital.

☆

Remember back in school when everyone starting suddenly dying? No, nor me.

☆

Sudden Invented Deceptive Syndrome

COVID-19 vaccines and kids: What parents should know

12:20 PM · Jun 27, 2021

..is it really safe for use?

Rochelle Walensky, MD, MPH
@CDCDirector

#COVID19 vaccines are safe for children 5-11. They have undergone the most comprehensive & intense safety monitoring system in U.S. history. To date, no serious safety concerns have been identified. Vaccination is the best way to protect children from COVID-19.

Contraindications

Do not administer Pfizer-BioNTech COVID-19 Vaccine to individuals with known history of a severe allergic reaction (e.g., anaphylaxis) to any component of the Pfizer-BioNTech COVID-19 Vaccine (see *Full EUA Prescribing Information*).

Revised: 22 December 2022

10

Warnings

Management of Acute Allergic Reactions

Appropriate medical treatment used to manage immediate allergic reactions must be immediately available in the event an acute anaphylactic reaction occurs following administration of Pfizer-BioNTech COVID-19 Vaccine.

Monitor Pfizer-BioNTech COVID-19 Vaccine recipients for the occurrence of immediate adverse reactions according to the Centers for Disease Control and Prevention (CDC) guidelines (<https://www.cdc.gov/vaccines/covid-19/clinical-considerations/managing-anaphylaxis.html>).

Myocarditis and Pericarditis

Postmarketing data with Pfizer-BioNTech COVID-19 Vaccine demonstrate increased risks of myocarditis and pericarditis, particularly within the period 0 through 7 days following the second dose of the primary series. The observed risk is higher among adolescent males and adult males under 40 years of age than among females and older males. The observed risk is highest in males 12 through 17 years of age. Although some cases required intensive care support, available data from short-term follow-up suggest that most individuals have had resolution of symptoms with conservative management. Information is not yet available about potential long-term sequelae. The CDC has published considerations related to myocarditis and pericarditis after vaccination, including for vaccination of individuals with a history of myocarditis or pericarditis (<https://www.cdc.gov/vaccines/covid-19/clinical-considerations/myocarditis.html>).

Syncope

Syncope (fainting) may occur in association with administration of injectable vaccines, in particular in adolescents. Procedures should be in place to avoid injury from fainting.

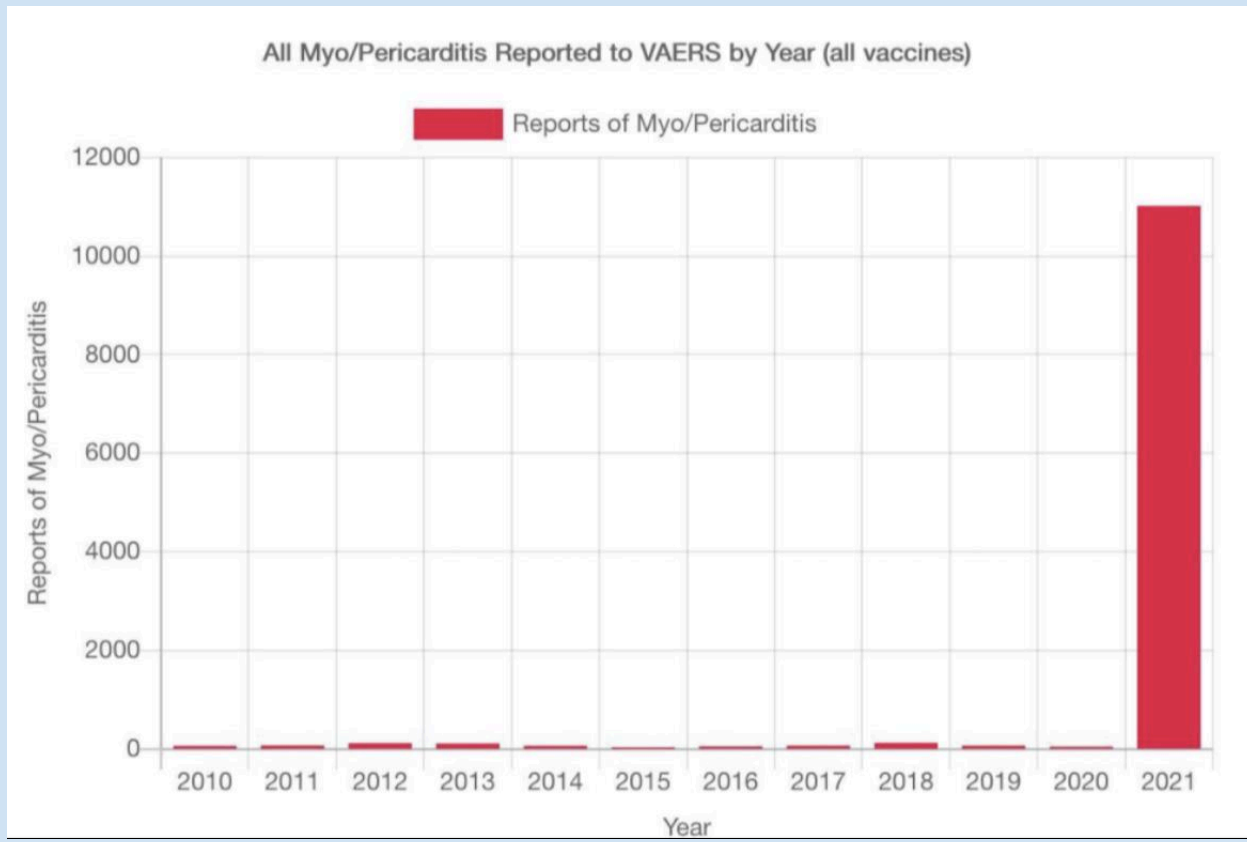

Altered Immunocompetence

Immunocompromised persons, including individuals receiving immunosuppressant therapy, may have a diminished immune response to the Pfizer-BioNTech COVID-19 Vaccine.

Limitation of Effectiveness

Pfizer-BioNTech COVID-19 Vaccine may not protect all vaccine recipients.

Re: *Physician Whistleblower Accounts of Severe Covid-19 Vaccine Injuries*

Dear Mr. Becerra, Dr. Walensky, Dr. Woodcock, Dr. Marks, and Dr. Shimabukuro:

We write with the utmost urgency on behalf of physicians from across this country -- see the 11 declarations attached -- whose firsthand reports of serious and fatal injuries from COVID-19 vaccines to your public health agencies have not been taken seriously and remain unaddressed.

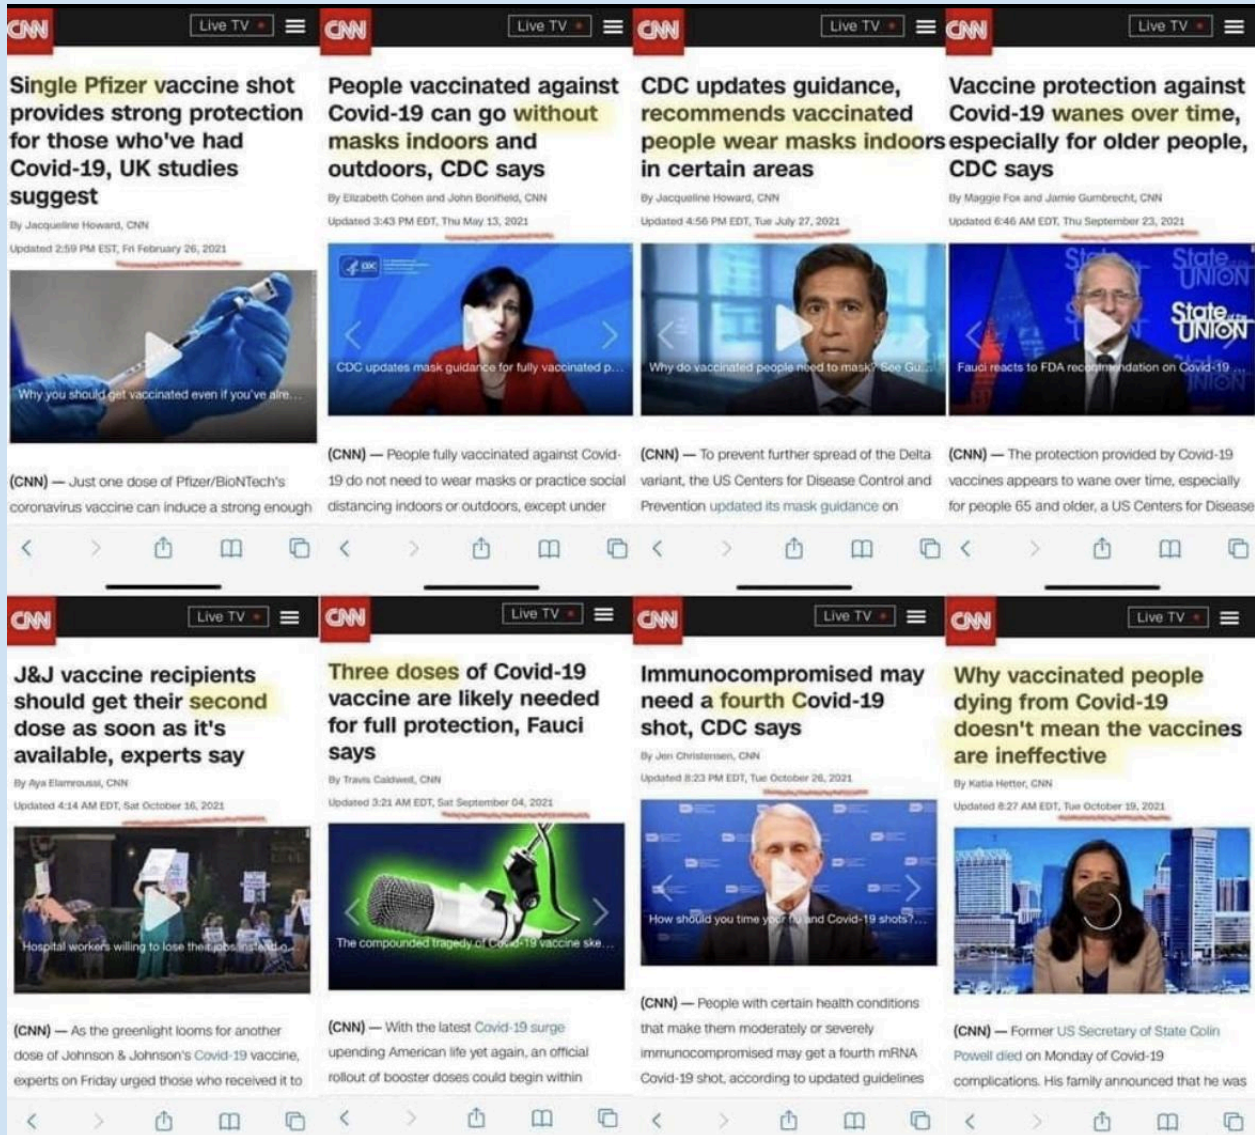

A. Injuries from Covid-19 Vaccines

The harms they have been reporting are not redness at the injection site. The harms are all serious. As detailed in the appended declarations signed by these physicians, they include serious cases of:

small fiber neuropathy; loss of temperature sensation in extremities;
constant shakiness to muscles; lesion on spinal cord; paresthesias;
tachycardia; fatigue; heat intolerance; gastric paresis; joint pain;
subjective fevers; paresthesias; brain fog; tremors; twitching;
internal vibrations; tinnitus; blurred vision; dizziness and
imbalance; headaches; balance difficulties; burning sensations;
menstrual cycle irregularities; hair loss; bladder incontinence;
cognitive impairment; persistent numbness and tingling in hands;
constipation; irritability; weakness

Each of these harms has been confirmed, based on the clinical judgment of the patient's treating physician, as being caused by a Covid-19 vaccine.

Six Canadian Doctors die suddenly within two weeks

Young, healthy Canadian Doctors are being hit by the previously unheard-of phenomenon called Sudden Adult Death Syndrome (SADS).

By Tamara Ugolini | August 02, 2022 | News

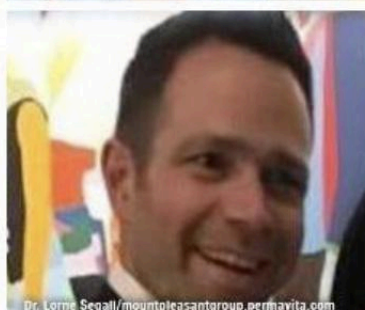

Dr. Candace Nayman/Twitter

A previously unheard-of phenomenon called [Sudden Adult Death Syndrome](#) (SADS) has received a lot of [attention](#) in recent months.

Ontario Doctors are not immune to this recent rise in SADS cases. As evidenced by [The Epoch Times](#), it details the sixth Doctor that died suddenly in late July, 27-year-old Doctor Candace Nayman.

Nayman worked as a Doctor at McMaster Children's Hospital (MCH). Her employers noted that she collapsed while competing in a triathlon and consequently died.

A mere day earlier, on July 27th, Trillium Health Partners (THP) also posted
