

## BATAAN PENINSULA STATE UNIVERSITY-ORANI CAMPUS

Office of the Physical Plant and Engineering Services

C.I.1 The classrooms are clearly marked and arranged relative to their functions.

The academic programs at Orani Campus are supported by a well-organized physical environment, where classrooms are clearly labeled and purposefully designed according to their educational functions. Each room is assigned a unique identifier and signage that aligns with its specific use—whether for lectures, laboratory activities, or collaborative learning. This clear labeling not only enhances navigability for students and faculty but also reinforces an efficient learning atmosphere.

In line with institutional goals, specialized classrooms such as science laboratories, computer rooms, and language centers are configured with the appropriate equipment and furniture that suit the program requirements. For instance, laboratory rooms are equipped with safety apparatus and instructional tools, while lecture rooms are arranged for optimal acoustics and visibility. This thoughtful arrangement reflects the campus' commitment to delivering program outcomes through conducive learning spaces.

The spatial organization of classrooms also supports the seamless delivery of different academic programs. By aligning physical infrastructure with academic functions, Orani Campus ensures that students receive instruction in environments best suited to their field of study. This strategic alignment between classroom design and program delivery demonstrates the institution's responsiveness to quality assurance in teaching and learning.
