MOTIVATION AND EXPECTED OUTCOMES

Motivation Letter:

Dear Selection Committee,

My name is KhosiyatSultonova, and I am currently studying Chemistry Education at Universitas Negeri Yogyakarta as an international student. With a deep curiosity about how science improves lives, I am writing to express my sincere motivation to join your International Summer Pharmacy School.

Since the beginning of my studies, I've been fascinated by the role of pharmacy in shaping global health. My passion for chemistry is not just academic — I see it as a language that connects innovation, care, and hope. Attending your summer program would give me the chance to explore this connection more deeply, while gaining new perspectives on pharmaceutical science and healthcare systems from around the world.

I come from a multicultural and multilingual background — I speak Turkish, Uzbek, Russian, Tajik, and English — and I believe this has taught me to be open, adaptable, and ready to learn from people of all walks of life. I'm also currently learning Indonesian, which has shown me how communication is key in both science and human connection. I'm looking forward to meeting students from different countries, exchanging ideas, and learning not just about pharmacy, but about people.

From this program, I hope to develop a stronger understanding of pharmacy's role in patient care, research, and global health policy. I also hope to grow as a young scientist — more confident, more informed, and more inspired to make a difference in the future.

Thank you very much for considering my application. I would be honored to be a part of your program and bring my passion, energy, and curiosity to this enriching experience.

Warm regards,

Khosiyat Sultonova
