

How to extract number from a string

Jing, mqjing@gmail.com

```
def get_num(x):  
    return int("".join(ele for ele in x if ele.isdigit()))
```

Usage

```
>>> x= '$120'  
>>> y = ' 90 Degrees F'  
>>> banana = '200 kgm'  
>>> orange = '300 gm'
```

```
>>> get_num(x)  
120  
>>> get_num(y)  
90  
>>> get_num(banana)  
200  
>>> get_num(orange)  
300
```
