

**TITLE OF PAPER (MAXIMUM 20 WORDS)**

*[Times New Roman 14, bold, centered]*

**Author<sup>1</sup>, Author<sup>2</sup>, Author<sup>3</sup>**

*[Times New Roman 11, bold, centered]*

<sup>1,2</sup>Author Affiliation, <sup>3</sup>Author Affiliation

<sup>1</sup>e-mail of correspondence

*[Times New Roman 11, centered]*

**KEYWORD**

Should be written with lowercase letters except abbreviations, each separated by a comma, can be used as clues in searching, and consist of 5 words in maximum. *[Times New Roman 10, justified]*

**ABSTRACT**

These instructions give you basic guidelines for preparing papers. Use the same font and size given in this template for each section. Abstract is in English covering the central issues of the study, the objectives, the methods/approaches and the results of the study. Abstract consists of one paragraph, not to exceed 250 words. *[Times New Roman 10, justified]*

**INTRODUCTION**

The Introduction section should provide: a clear background, a clear statement of the problem, the relevant literature on the subject, the proposed approach or solution, and the new value of research which it is innovation (within 3-6 paragraphs). Manuscript paper is single-spaced, written in one column format, on standard A4-sized paper (21 cm x 29.7 cm) with a maximum of 8 pages.

Chapter titles, except the Introduction, Conclusions, and Future Works, should explicitly declare the contents. However, it is not necessary to be explicitly expressed as a Basic Theory, Design, and so forth. Left- and -right justify your columns. Use tables and figures to adjust column length. On the last page of your paper, adjust the lengths of the columns so that they are equal. Use automatic hyphenation and spelling check. Digitize or paste down figures.

**METHOD**

Method consists of research design (for a quantitative research approach includes types and research approaches, population, samples, variables; for a qualitative research approach includes types and research approaches, subject and object of research), time and place of research, instrument, data gathering, data analysis. This template already sets the style and formatting for the paper.

**RESULTS**

Results consist of research data or findings, data tables, and the results of data analysis. Figure captions should be centered below the figures, while table captions should be centered above the tables. Avoid placing figures and tables before their first mention in the text.

Figure 1. Figure name

Avoid confusion due to the image axis labels, because figure axis labels are often a source of confusion. Use words rather than symbols. For example, write “Velocity,” or “Velocity (v)” not just “v”. Put units in parentheses. Do not label axes only with units. For example, write “Velocity (m/s)” or “Velocity (ms-1).” Do not label axes with a ratio of quantities and units.

No.	Name	Note
1.		
2.		
3.		
4.		
5.		

**DISCUSSION**

This consists of finding of the research derived from data analysis. The finding may relevant or support a theory (ies) or againts the theory (ies). Use theoretical bases in the discussion.

**CONCLUSION**

It is the summary of the results of the study and discussion. It is suggested to highlight the novelty as well as the breakthrough of the study. Recommendation may also be expressed in this section.

**REFERENCES**

The bibliography and citation follow the author-year IEEE style. Make sure the number of references at least 10 and all are cited in the text.

Scriptwriting and citation referred to in this paper are recommended using application of reference manager, such as Mendeley, Zotero, End note and so on.
