

TV Screen and Mac Mini Computer

KJCC LL01 Classroom (Basement KJCC) Classroom B01

- 1) Turn on TV by pushing the power button on left side of TV (as indicated by the Red Arrow in image below.) You'll see a light come on the bottom frame of TV and "Sharp" come on-screen, indicating it's on.
- 2) Push 'Input' button (also on left side of TV) a few times until 'MacMini' is highlighted on the list on the screen. Login to the **FAS AV User** account with the password **@NYU1831** Refer to the Instructions for using Zoom in Mac Hybrid Classroom that are posted in the classroom.
- 3) If you're connecting your personal laptop via the HDMI or the HDMI by USB-Cable, then push the 'Input' button until you see the 'Wallplate' input on the screen and your laptop image comes up on screen.

Notes:

- The Bluetooth Mac Keyboard & Mouse - Needs to be charged occasionally with USB cable. They control the Mac Mini attached to the TV monitor.

DO NOT REMOVE ANYTHING FROM FRONT OF ROOM!

- The Bluetooth Mac Keyboard is rechargeable and has an On-Off switch and the charging port on the back edge of the keyboard – Switch is green when On
- The Bluetooth Mac Mouse is rechargeable and has an On-Off switch and charging port on bottom of mouse and cannot be used while charging – Switch is green when On
- If Bluetooth Keyboard and/or mouse is not working, there is a USB keyboard and mouse plugged into the USB port in the wall plate and controls the Mac Mini attached to the TV monitor.
- If you're connecting your personal laptop via the HDMI or the HDMI by USB-C Cable, that connects to the wall plate then push the TV's 'Input' button until you see the 'Wallplate' input on the screen and your laptop image come up on screen.
