

[Lecture 01a Voltage, Current, Resistance and Ohm's Law](#)

[Lecture 01b Work](#)

[Lecture 02 Basic Circuitry and Circuit Components](#)

[Lecture 03a Kirchhoff's Laws](#)

[Lecture 03b Power](#)

[Lecture 04 Series, Parallel and Total Resistance](#)

[Lecture 05 Voltage Divider and Current Divider Rules](#)

[Lecture 06 Combining Sources and Redrawing Circuits](#)

[Lecture 07 Source Conversion](#)

[Lecture 08 Nodal Analysis 1](#)

[Lecture 09 Nodal Analysis 2](#)

[Lecture 10 Thevenin Equivalent Circuits](#)

[Lecture 11 Max Power Transfer Theorem](#)

[Lecture 12 Capacitors, Inductors and Steady State Analysis](#)

[Lecture 13 Capacitor and Inductor Transient Analysis](#)

[Lecture 14 Intro to AC and Sinusoids](#)

[Lecture 15 Phasors and Complex Numbers](#)

[Lecture 16 Impedance and Ohm's Law](#)

[Lecture 17 AC Circuits and Kirchhoff's Laws](#)

[Lecture 18 Total Impedance and AC Divider Rules](#)

[Lecture 19 AC Source Conversions](#)

[Lecture 20 AC Nodal Analysis](#)

[Lecture 21 AC Thevenin Equivalent Circuits](#)

[Lecture 22 Real and Reactive Power](#)

[Lecture 23 Complex Power and the Power Triangle](#)

[Lecture 24 Power Factor and Power Factor Correction](#)

[Lecture 25 AC Max Power Transfer Theorem](#)

[Lecture 26 Resonant Circuits and Filters](#)

[Lecture 27 Magnetism and Transformers](#)

[Lecture 28 Transformers and Reflected Impedance](#)

[Lecture 29 Linear Motors](#)

[Lecture 30 Rotating DC Motors](#)

[Lecture 31 AC Generators I](#)

[Lecture 32 Three Phase Generators and Y Loads](#)

[Lecture 33 Three Phase Generators and Delta Loads](#)

[Lecture 34 Three Phase Power](#)

[Lecture 35 AC Generators II](#)
