

NA/EU Island Rewards Guide

Created by Rhy (Discord: rhy#3722)

General Notes

- These islands rewards match what current KR has, which were changed to help new players catch up. It is unknown at this point if the rewards will be the same on release.
- Before doing these islands, it is recommended to do the ship upgrade guide quest that starts in Vern to get a level 2 Estoque.
- It is also recommended to equip accessories with swiftness and any other movement speed bonuses, as well as creating a skill preset with movement skills as you cannot mount on the islands.
- You can leave islands instantly with the Song of Escape or by typing /escape (15 minute cooldown).
