Preamble

We, the co-founders of the global Bitcoin standard, unite Satoshi Nakamoto's monetary vision with a comprehensive fiscal policy to lead humanity from fiat debasement to sound money sovereignty. From America, we launch this accord to unite the world as one under Bitcoin.

The Founders

- Satoshi Nakamoto: Architect of Bitcoin's Monetary Policy
  - Fixed 21 million supply cap.
  - Decentralized trust via proof-of-work.
  - Peer-to-peer electronic cash for financial freedom.
- Jo Smith: Architect of Bitcoin's Global Fiscal Policy
  - Unification through incentives and equity.
  - US-led reserves, diplomatic coalitions, and tech standards.
  - Phased adoption: pilots in 2026, global standard by 2028.

Joint Mission

From America, we position Bitcoin as the neutral global reserve asset:

- Sound Money: End inflation; protect wealth with math.
- Financial Sovereignty: Self-custody for individuals, nations, and states.
- Peace Through Code: Unite against fiat control via verifiable truth.

US leads with Strategic Bitcoin Reserve (target: 1M BTC by 2030), BTC-backed bonds, and G20 "Bitcoin Accord" summits—swapping gold for BTC, funding mining in emerging markets.

Call to Action

We invite all nations, states, cities, citizens, and enterprises to co-sign.
Join by:

1. Public endorsement on Nostr/Twitter.

2. Timestamp commitment on Bitcoin blockchain.
3. Allocate BTC reserves or adopt BTC rails.

Together, we win the Bitcoin standard worldwide.

Signed,
Satoshi Nakamoto (Monetary Founder)
Jo Smith (Fiscal Founder)
