

SMART Tools on Taskbar

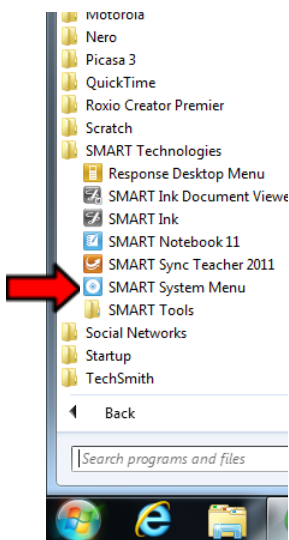

Under the SMART System Menu Icon on your taskbar, you have many great tools that can be used in and out of SMART Notebook including:

- Screen Capture Toolbar
- Screen Shade
- Hide & Show Floating Toolbar
- SMART Recorder
- SMART Video Player
- Keyboard
- Spotlight
- SMART Settings
- Help

If after at anytime you lose the SMART System Menu icon on your taskbar, follow these steps to get it back:

1. Go to START. 
2. Open "All Programs."
3. Open the "SMART Technologies" Folder.
4. Open the "SMART System Menu."

This should bring the icon back to your taskbar so that you can access your SMART Tools inside and outside of Notebook.

If you still cannot see it on your taskbar, look for a small triangle on the taskbar. When clicked, this triangle reveals hidden taskbar icons.
