

If you are reading this, I have leaked a large quantity of AJA materials to Model Wikileaks

I love the Libertarian Party, I have put in so much work for the party, I have only done it because I care about the people and the party values, But I have had to leave the party for a few reasons, Most of them personal. But be aware, I do not bear a grudge against anyone, It's just the fact that the LEC is controlled by one single person working in the shadows.

Nevertheless, As you might be aware, AJA was a failure, There is no denying it, But certain individuals keep denying it and kept trying to appease the Democrats. When I warned against the AJA, I was insulted, When I warned against a policy of appeasement, I was insulted. I simply cannot continue my work as Party President with such people. I'm sorry, But this party has gone off course, I will never forget all the great memories I had in the Libertarians. This is the end as I am joining the Republicans.
