Abstract

(Calibri, 12) The abstract should clearly state the outcome of the research. There's no need to include the aim, methods, or experimental design. It should be composed as one paragraph and **must not exceed 300 words.**

Keywords: (Calibri 12, *Italic*) *A list of relevant keywords that represent the main topics of the research.*

1. Introduction

(Calibri 12) This section briefly and clearly outlines the purpose behind writing the paper. The introduction provides the necessary context for readers to comprehend and assess the experiment conducted while presenting the study's rationale.

This section should:

- Clearly explain the nature and importance of the problem
- Review relevant previous studies in a synthesized manner
- Identify research gaps or limitations
- State the purpose, objectives, and contribution of the paper
- End the introduction with a clear statement of the study's contribution or novelty.

Citation Notes:

- Arrange citations **chronologically** (earliest to latest), separated by semicolons
- Use APA 7th Edition style in-text citations

Examples:

- Parenthetical: *(Borowitzka & Brown, 1974; Pollard & Wyn Jones, 1979)*
- Narrative: *Ellis and Minton (2003)*
- Multiple works, same author/year: *(Haque et al., 2005a,b)*

2. Materials and Methods

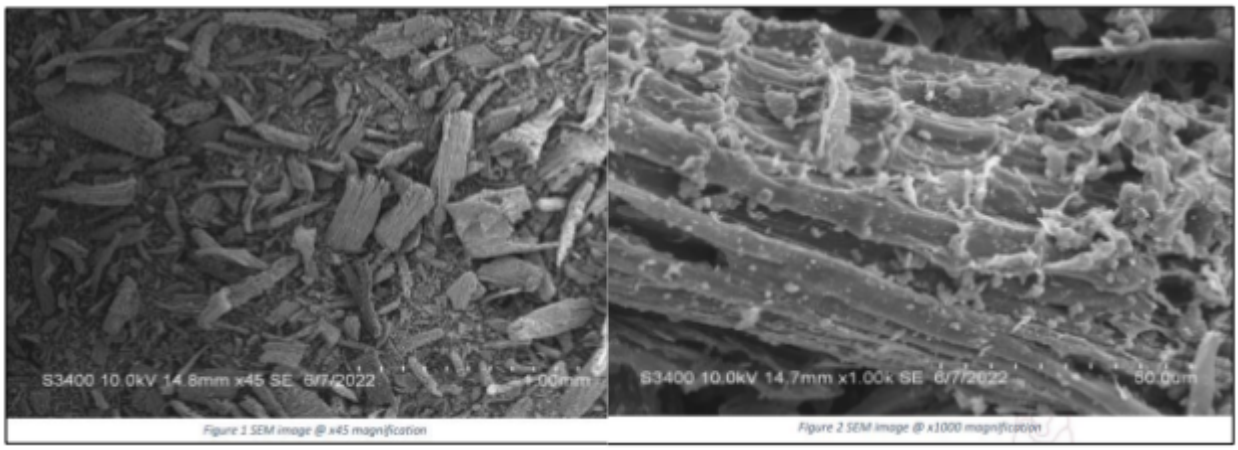

2.1. Subsection

(Calibri 12) In the Materials and Methods section, describe how you did your research. Essentially, it outlines the steps taken to address your research question. This section includes a detailed list of any materials used in the research or experimentation and explains the methodologies applied throughout the study. If you need more subsections, please add it using the prescribed format (i.e., 2.1, 2.2, etc.) and should there be sections under a subsection, you may include it with the appropriate numbering (i.e., 2.1.1, 2.1.2, etc.).

3. Results and Discussions

3.1. Subsection

(Calibri 12) This section informs the reader of your discoveries and their implications. The results section should present the data objectively and academically. The results must be clearly explained with detailed statistical analysis. Each part should include the output of the experiments, model, or computations.If you need more subsections, please add it using the prescribed format (i.e., 2.1, 2.2, etc.) and should there be sections under a subsection, you may include it with the appropriate numbering (i.e., 2.1.1, 2.1.2, etc.).

4. Conclusion

(Calibri 12) Brief summary of the main findings and their significance

Acknowledgment

(Calibri 12) Recognition of individuals, institutions, and funding sources that contributed to the research.

Declarations

Conflict of Interest

(Calibri 12) Declare any financial or professional conflicts. If none: “The authors declare no conflict of interest.”

Funding

(Calibri 12) State funding agency and grant number. If none, write: “This research received no external funding.”

Data Availability Statement

(Calibri 12) Indicate whether data are:

- Publicly available (provide repository name)
- Included as supplementary materials
- Available upon reasonable request

Ethical Approval

(Calibri 12) Include ethics committee approval number for studies involving humans, animals, or sensitive data.

AI Declaration (if any)

(Calibri 12) Disclose AI use only if AI tools were used for content generation, analysis, or structuring.

Template Statement:

The preparation of this manuscript by [tool/service name] for [purpose] was reviewed and edited by the authors, who take full responsibility for the content.

References

(Calibri 12) The list of References should only include works that are cited in the text and that have already been published. Please ensure that all references are formatted according to the APA 7th edition guidelines. References should be listed in alphabetical order by the last name of the first author.
