

Drayton Aerospace opens new offices in India and the United States

Broadening its parts trading, asset sales, repair management, aircraft acquisition and dismantling business activities.

September 2024. Drayton Aerospace's part trading business is opening two new offices, one in Mumbai, India and the other near DFW Airport, Texas, firmly cementing the company's strategy of an increased presence and accelerated growth in the used serviceable material (USM) market.

Not only will the new office in India compliment the various business units in lowering Drayton's asset acquisition costs but it will focus on the expansion of their parts trading, asset sales, repair management, aircraft acquisition and dismantling business activities.

With a dedicated team committed to these activities, the office will play a key role in positioning Drayton as a service leader in the overall lifecycle of aircraft into teardown and reuse, while strengthening the company's every growing parts trading business.

Similarly, the company will also be opening an office in Grapevine, Texas near DFW Airport with complimentary objectives and performance measures to the operation in India. In addition, the new team in the US will provide an integrated logistics hub to support improved logistics within the overall Drayton group and to clients worldwide.

Drayton Aerospace is one of the leading independent aviation and MRO providers operating globally. With capabilities that include landing gear, engine, component, air frame maintenance as well as parts trading and end of life airframe solutions.

With their continued focus on growth through partnerships and acquisitions, Drayton Aerospace is set to continue this growth trajectory well into the future.

End.
