## Living Things Vocab Terms 1

Match the meaning to the vocabulary term.

|                                           |                                                                                                                         |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1. ____ <b>Herbivore</b><br>(hur-bi-vaw)  | A. An animal that hunts and kills other animals for food.                                                               |
| 2. ____ <b>Omnivore</b><br>(om-ni-vaw)    | B. An animal that eats other animals.                                                                                   |
| 3. ____ <b>Carnivore</b><br>(kar-ni-vaw)  | C. An animal that eats plants as their main food source.                                                                |
| 4. ____ <b>Food chain</b><br>(fu-d web)   | D. A diagram showing which creatures eat other things or other creatures.                                               |
| 5. ____ <b>Food web</b><br>(fu-d web)     | E. An animal that eats either other animals or plants.                                                                  |
| 6. ____ <b>Predator</b><br>(pred-uh-tuh)  | F. An animal that feeds on any animals that they find that are dead.                                                    |
| 7. ____ <b>Prey</b><br>(pray)             | G. A system where a small animal is the food for a larger animal which, in turn, is the food for an even larger animal. |
| 8. ____ <b>Scavenger</b><br>(ska-vun-juh) | H. An animal that is hunted and killed by other animals for food.                                                       |

**Show understanding.**

Pick **two** terms. Write 1-2 sentences.

*Example*

**Herbivore.** Elephants are herbivores. At the zoo we see them being fed plants and fruits.
