

EARTHLING CULTURE STUDY:001

Peridot: Earth Date; "*August?*" 26th of Earth year [Static]

(Spoken inna very astute tone)

Peridot: Greetings, I am Peridot; Former Homeland loyalist and Technician. It was at the behest of my Captors— er...I mean...At the behest of my *Friends*; That I might have trouble understanding Earthling culture.

(Sarcastic, but still astute)

Peridot: I'm not sure why they would think that, I have an aptitude for study...but I digress. Therefore Steven had suggested that I document my quote; "Journey into human culture" I have chosen videographic recording I.E Videocassette Recording Tapes as my form of documentation.

(Condescending tone)

Peridot: They are terribly primitive but if rudimentary means can complete a task then who am I to complain?

(Astute tone)

Peridot: I have chosen to show these video cassettes to the crystal gems when Steven has turned 18. That gives me ample time to improve and perfect my grasp of human understanding. I do so not because I *care* about Steven's eighteenth birthday. No, I do so because I am confident that I'll be able to learn all of human culture in only 6 years.

Peridot: Nevertheless, I have concluded the fastest way to begin understanding the human condition is Through their local food culture. You see, humans (unlike gems) function off of a caloric system. sustenance is consumed and digested turning that potential food energy into caloric energy which they then use to function.

(Condescending)

Peridot: Again. Rudimentary...

Peridot: I have humbly asked Amethyst for the rundown on the human digestive system and I have learned about the entirety of their inner workings. Naturally, I have recreated their insides and manifested them here within my own gem-self. From tongue to anus. I am quite proud of my handy work!

Peridot: I do this to understand the process of "*Eating*" and with the procurement of 20 United States Banknotes taken slyly from garnets "wallet"; I have bought 4 foot long "*Chili cheese dogs*" along with a side of "*double fried onion rings*"

(Disgusted tone)

Peridot: They look dreadful.

Peridot: But if I, Peridot, am to continue my research then I must boldly go where no gem has gone before. Crystal Gems, if you are watching this and this repulsive “Food” happens to shatter me from the inside; My expiration is on your hands.

Peridot: For posterity sake I shall now show the work I have done on my recreation of the human digestive system. Starting with the exterior orifices.

Peridot: This is my new Mouth. Take notice of how velvety my tongue is, how long and slick it is. Creating saliva production was tricky but as these long slippery strands of spittle drip off my tongue I think I can look at it proudly! Teeth were more straightforward than I had thought and I'm grateful for that. Did you know they are just exposed bones? Fascinating!

Peridot: Now that the entrance orifice has been shown, I shall now show the exit orifice.

Peridot: This is my posterior, I have taken the liberty of adding a few more inches to my hips for aesthetic purposes As i have been told that is desirable. Ive made it a note to study “Badonkadonks” in my free time; for this topic is most confusing.

Peridot: As you see here I have put much work into each green wobbly cheek. If I were to smack it my “*butt*” it would wobble. Perhaps even jiggle. I am quite fond of the sound it makes when I bounce up and down. Amethyst had told me it was called ‘Clapping it’ but pearl had ended my interview shortly after that.

Peridot: I have a feeling that ‘Clapping my butt’ is yet another facet of human culture I will surely learn that in time. For the time being I will continue *This* line of documentation.

Peridot: Notice how round my ‘Anus’ is. Each individual asshole wrinkly painstakingly created by me! Quite amazing isnt it? Gaze upon the greatness of my pucker. Heheh. Ive made sure that my ‘butthole’ was tight and aesthetically pleasing. I am very fond of the darker green hue. It very much stands out and compliments my pretty green cheeks and I am exceedingly proud of my work.

Peridot: Ive also discovered that if I flex my butt I can make my exit orifice “wink”. What a curious ability....

Peridot: I still have no idea what function It serves, but its fun to watch! ...or... atleast / think it is.

Peridot: With both orifices shown I will now begin to subsume my food.

Peridot: ...eugh... these Hotted Dogs are so... Sloppy. They are covered smothered in some processed airy product known as "cheese" and then topped with a... Stew of beans and meat- this is called Chili. They look repugnant.

Peridot: Aaaaaaaah

[Bunch of eating sounds, lip smacking little 'Mmms' and 'Ooohs']

(Enthused, This is delicious!)

Peridot: It's an interesting texture, the flavor is like nothing I've ever experienced before!

Peridot: Not even technical maintenance on homeworld can hold a candle to this!

[More lip smacking]

(You are reveling in the flavor)

Peridot: Oh my stars...Mmpfh... this is incredibly satisfactory!

Peridot: I'm going to try the onioned rings now.

(Enthused again)

Peridot: MMMM! how could I have been such a cold?! I could have been eating this since the moment I got here?

[More lip smacking]

Peridot: ...I am going to finish eating this food. I will resume the recording once all has been consumed.

[Static]

(Strained Tone, you feel bloated, your stomach hurts)

Peridot: Peridot Signing in, Earth Date; Same day, 40 minutes later.

(Strained tone)

Peridot: I knew there was a reason for my apprehension! After I had consumed my 4th chili cheese dog I had felt a horrible pain in my stomach. What seemed to be some sort of internal beast groaned from my stomach and I could feel some sort of pressure building. I have done my best to withstand it but I feel as if my time is running short!

Peridot: I've signed back on to show the affects of my affliction. I know not what will happen but in the name of science, of intellectual pursuit I persist!

(Strained tone, overly dramatic)

Peridot: Observe what will surely be the throes of my shattering!

[Grunt the sigh]

(surprised tone)

Peridot: W-what? What was that?!

Peridot: Am I dying? What was that?! Some sort of audible discharge! What in the stars was that?!

(Questioning)

Peridot: is it replicable?Maybe it was A positioning thing? Here wait, allow me to get into a better position....

(Questioningly)

Peridot: I am now facing my behind towards the camera. It has felt as if a gust of wind Has escaped my rear endperhaps.... if I were toflex my anus then I could replicate it.

[Grunt Then sigh]

(Excited!)

Peridot: AH! I've done it! Wonderful! What an extraordinary discovery! I feel the pressure dampening. I will continue to expel the discomfort! Please excuse me.

[Grunt then sigh]

Peridot: This feeling is ...hmm... acceptable...

[Grunt then groan]

Peridot: Oh wow....

[Grunt then moan]

(You're starting to get turned on, you're starting to enjoy it)

Peridot: With subsequent expulsions I have found the feeling to be quite...mmmpfh.... Satisfactory...~

[Grunt then moan]

[Grunt then sigh]

(Playful tone, keep that aroused tone)

Peridot: Phew! I've taken notice of a smell. I'm not sure where it is coming from... maybe Amethyst has left her dirty undergarments somewhere in my domicile. Nevertheless I will continue my experiment.

[Grunt then sigh]

[Grunt then moan]

(Aroused)

Peridot: Oh...yeah...it feels really...uh...good. To let this out. Hehehe...~

Peridot: They have become rather loud, I have also felt a wetness between my cheeks. I am not sure of the correlation but more experimentation is needed.

[Grunt then sigh]

[Grunt then moan]

(Playfully aroused)

Peridot: That smell is growing stronger. Perhaps it is in relation to my gaseous explosions~? Perhaps. More study is needed.

[Grunt then groan]

[Grunt then moan]

Peridot: yeah...ah... mpfhmmm... I am thoroughly enjoying myself-

[Grunt then moan]

Peridot:-- AH, wet...very very wet. Very very...mpfh... interesting...hehe..~

[Grunt then sigh]

[Grunt then moan]

Peridot: I feel my posterior
rumble with each and everyone of these emissions.

Peridot: I can feel them clatter against my cheeks, that wetness is allowing them to t
sputter out! I am quite fond of the feeling~!

[Grunt then giggle]

Peridot: I will continue to experiment off camera...but what I have learned today is invaluable!

[Grunt then giggle, follow it with a groan of pleasure]

Peridot: This is peridot... mpfh... signing off.

[Grunt then sigh]

[Static]
