
Hello John,

We want to take a moment of your to thank you for your active participation of you in our seminar on Climate change and the crisis that follows it.

We are happy that the whole world slowly yet is waking up from the sleep of ignorance and is starting to get aware of what is happening to our nature because of the abuse that we did.

Ranging from water, soil, and air, everything is polluted; trees are cut and the coming generations are going to face the crisis of everything that comes from nature. For them, life will be competitive in terms of career and what they can afford to get from nature.

We are glad that you were an active participant in the seminar, and your ideas were very much appreciated by other people and the jury as well. We are glad that we will be publishing them under your signature in our yearly organize so that the word of caution reaches most of the people.

We would like to request you to please take a stand against the abuse that people are doing to nature and conduct events like this in your region.

We extend an opportunity to you to partner with our organization and conduct such workshops, seminars, and silent protests to spread awareness amongst the coming generations. If you are interested we would be happy to discuss various aspects of this partnership.

In the end, kindly fill out that form attached to the email for marking our performance and event management so that we do our best next time. Your suggestions are always welcome for the growth of the organization and the betterment of the managing committee.

Regards
