

Attendees

- Pieter Pauwels [Ghent University]
- Ana Roxin [Univ. of Burgundy]
- Walter Terkaj [ITIA-CNR]
- Anna Wagner [TU Darmstadt]
- Emilio Sanfilippo
- Mathias Bonduel [KUL]
- Mads Holten Rasmussen [DTU]
- Georgios Lilis [TUC]
- Seppo Torma
- Claudio Mirarchi [Polimi]
- Kyriakos Katsigarakis [TUC]
- Jun Wang [Curtin University]
- Gonçal Costa [LaSalle University]
- Maxime Lefrançois [MINES Saint-Étienne]
- Victor Malvar [neanex]
- Nicolas BUS [CSTB]

Excused

- Peter Bonsma [TNO]

Date and time

- 30/10/2017
- 17:00 CEST

Agenda

- Preparation for the TPAC Summit: Working Group or not?
- Brief chat about BOT/Product ontologies and how to relate them to bSI initiatives

Minutes

Meeting held at Arup in London (Pieter,Ana)

News from bSI Summit

- Presentations from this Monday morning - plenary session, mainly introductions about the China Rail Model, bSDD, etc.
- Technical Room no longer has a specific session in bSI
 - We now have Technical Focus Rooms and User Focus Rooms
- a session tomorrow (Oct. 31st) afternoon (starting 16.15pm)
 - The goal is to present what was done in the context of this W3C Community Group
 - Mads will present the BOT ontology + a demonstrator

- Question: Seppo how this relates to the [BRICK](#) schema, and discuss possible alignments
- Demonstrator: example queries are fired against a BOT instantiation displaying in real-time the elements from a Navis file as returned by the query (other file formats are supported e.g. SketchUp, rvt, etc.)

- Pieter will present the full spectrum of bSI - key principles use small ontologies and reuse existing ontologies by defining links to them
 - Modularize IFC, MVD as queries/rules, linked data for the bSDD
 - Little or no software implementation of the different “tools” existing in bSI (IDM, MVDs, etc.)
- As Technical Room members, we have participated in the:
 - MVD whitepaper
 - Regulatory Room use cases
 - Linking and Modelling Guide
 - bSDD
