

Progress Reports - Message To Parents 2024-2025 sm. 2

To continue with strengthening our connection with families and support student success, AHS continues to issue Progress Reports twice each semester. These reports aim to foster positive conversations between teachers, students, and parents, particularly for students who may be struggling. The Progress Reports will be provided at the 6-week and 12-week marks each semester, giving students time to improve their grades and demonstrate their learning.

Report Distribution and Dates:

- Progress Reports will be distributed during students' 2nd-hour class.
- The first report will be sent home on February 25, 2025.
- Future report date is April 23, 2025.

These reports will include grades for all of your child's classes. While they do not need to be returned, they are intended as tools for family discussions to celebrate achievements and address any areas needing improvement. This proactive approach helps prevent semester failures and ensures students remain on track for graduation.

Teacher Support: Teachers will also take time to speak privately with students within two days who may need additional help, such as those with failing grades, significant grade drops, or those who could benefit from extra support.

We encourage all families to review these reports together and engage in meaningful discussions to support your child's academic progress.
