

# Oceania Plenary Session: 'Collaborating Internationally for Regional Benefit'

### Plenary session:

This session will examine a range of ways in which working through the RDA and drawing on RDA outputs is being used to benefit research and research infrastructure in the region. A specific focus will be on Indigenous Data Governance, and the role of Open Science Platforms.

### Session's speakers:

• Indigenous Data Governance and the role of CARE:

o Guam: Dr Riley Taitingfong,

o Australia: Robert McLellan, HASS&I

• Open Science Platforms:

Korea: Dr. Jungho Uhm, KISTI,Japan: Mikiko Tanifuji, NII,

 Malaysia: Professor ChM Dr Noorsaadah Abd Rahman, FASc, Malaysia Open Science Alliance Co-Chair

Get involved in RDA Community

Check out **VP22 programme sessions** 

This meeting will take place according to the RDA Code of Conduct

**Attendee Check-in** 

Please complete this table to indicate your attendance (add rows as needed):

| Name              | Affiliation  | Location                | Email/social media                    |
|-------------------|--|-------------------------|---------------------------------------|
| Karen Ng Lee Peng | Universiti Malaya                                  | Malaysia                | karennlp@um.edu.<br>my                |
| Mingfang Wu       | ARDC   | Melbourne,<br>Australia | mingfang.wu@ardc.<br>edu.au           |
| Stefanie Kethers  | ARDC   | Melbourne,<br>Australia | stefanie.kethers@ar<br>dc.edu.au      |
| Lesley Wyborn     | ARDC   | Canberra, Australia     | lesley.wyborn@anu.<br>edu.au          |
| Veronika Stoka    | J. Stefan Institute                                | Ljubljana, Slovenia     | veronika.stoka@ijs.si                 |
| Francoise Genova  | RDA France/Observatoire Astronomique de Strasbourg | Strasbourg, France      | francoise.genova@a<br>stro.unistra.fr |
| Athina            | RDA Europe   | Thessaloniki, Greece    | athina                                |

| Papadopoulou       |  |                    | .papadopoulou@rda<br>-foundation.org |
|--------------------|--|--------------------|--------------------------------------|
| Yasuhiro Murayama  | NICT (Natl. Inst. of<br>Information and<br>Communications<br>Technology) | Japan              | murayama@nict.go.j<br>p              |
| Martina Stockhause | DKRZ/IPCC DDC  | Germany            | stockhause@dkrz.de                   |
| Michelle Barker    | ReSA   | Australia          | michelle@researchs<br>oft.org        |
| Andrew Treloar     | ARDC   | Australia          | andrew.treloar@ard<br>c.edu.au       |
| Tom Honeyman       | ARDC   | Australia          | tom.honeyman@ard<br>c.edu.au         |
| Riley Taitingfong  | University of Arizona  | USA                | rtaitingfong@arizon<br>a.edu         |
| Stéphanie Cheviron | Université de<br>Strasbourg  | Strasbourg, France | scheviron@unistra.fr                 |
| Mikiko Tanifuji    | National Institute of Informatics  | Japan              | tanifuji@nii.ac.jp                   |
| Jung-Ho Um         | Korean Institute of<br>Science and<br>Information<br>Technology          | Republic of Korea  | jhum@kisti.re.kr                     |
| Matej Petrič       | University of<br>Ljubljana   | Slovenia           | matej.petric@ff.uni-l<br>j.si        |
|                    |  |                    |                                      |
|                    |  |                    |                                      |
|                    |  |                    |                                      |
|                    |  |                    |                                      |

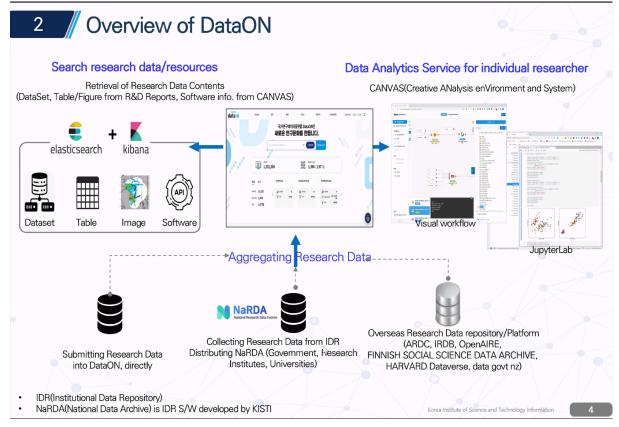

**Collaborative Session Notes** (*To be used by participants and chairs during the session*)

#### Korea

AT: CARE principles can also be applied to non-indigenous data, as we see in the Korean examples of application of CARE to DataON

Presentation file(Open Science Platform in S. Korea): <a href="https://doi.org/10.5281/zenodo.11229911">https://doi.org/10.5281/zenodo.11229911</a> In context of GORC: More on GORC at

Traditional Knowledge (TK) Labels:

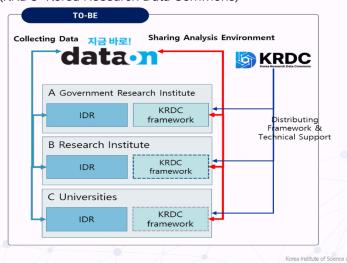

https://localcontexts.org/labels/traditional-knowledge-labels/

## 4 Future direction of DataON

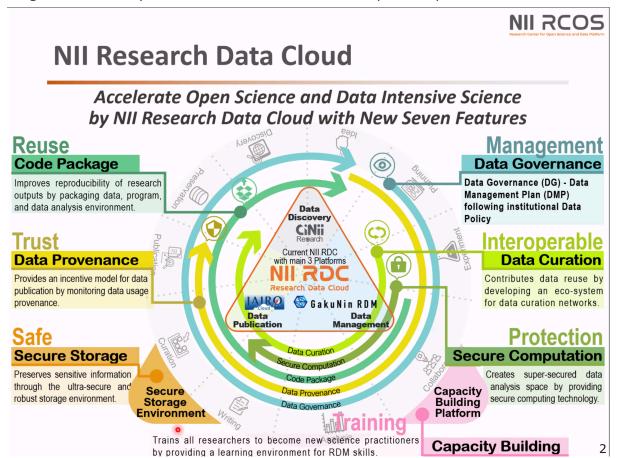

#### Supporting data driven research activity

- Discussing about demand for new strategy considering both research security and open science
- Integrating research data sharing platform(DataON) and research analytics environment sharing system(KRDC: Korea Research Data Commons)

Japan

Indigenous data not yet an active discussion within the Japanese open science domain

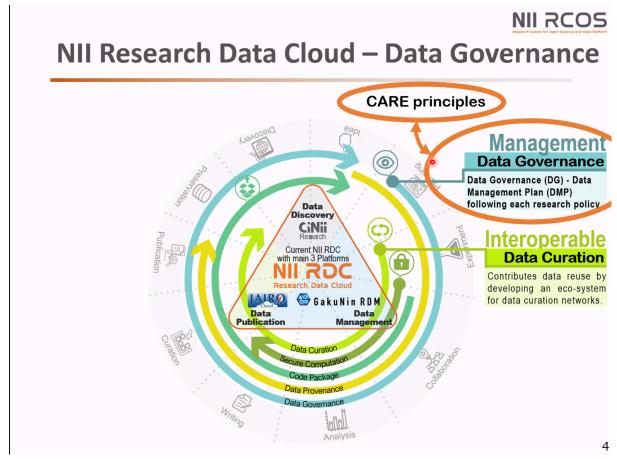

### **NII RCOS**

## **Indigenous Research**

### **Examples**

- Indigenous Knowledge in sciences
  - ➤ Ainu culture and indigenous peoples | 先住民族
  - ➤ Disaster management | 防災
    - Indigenous knowledge is important in the field of disaster management against natural disasters. Traditional folk beliefs, techniques and faiths from different parts of Japan are used for disaster management.
  - ➤ Environmental protection and symbiosis | 環境保全
    - Impact of non-native species |外来種の影響
    - ・ Habitat development for diverse organisms |多様な生物の生息環境
  - ➤ Regional development | 地域振興
    - enhance the vitality of a region

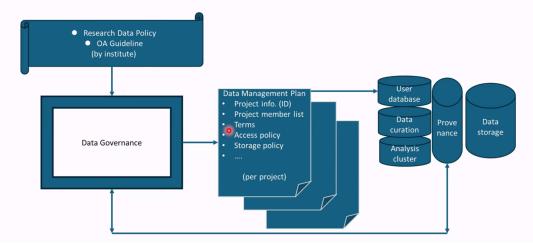

Important to link CARE principles to data governance.

## NII RDC - Japan open science platform

 Open science platform aims long term inheritable cultural platforms, with appropriate data management <u>RDM</u> with <u>DG</u> which comply with <u>Care Principles</u> for indigenous knowledge research.

**NII** RCOS

5

## Future - Japan open science platform

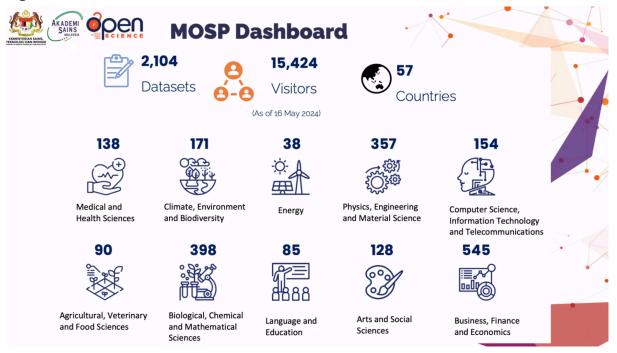

- Digitization
  - Books, images, photos ... in print
  - Metadata (schema) about the digitized data
- Utilizing as FAIRable data, applications

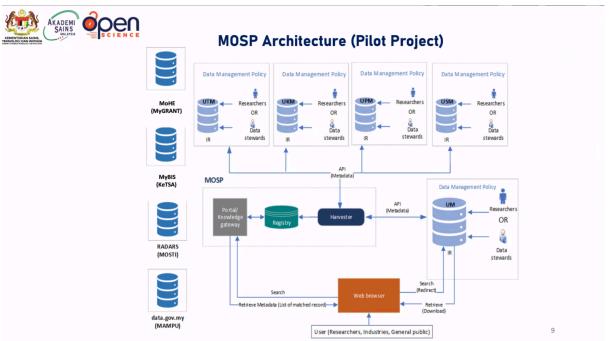

Opportunity to increase access to Ainu knowledge held in National Diet (Parliament) Library Malaysia

MOSP looks to gather research data into one platform that supports access and sharing aligned with FAIR

Indigenous knowledge can help with climate change and habitat loss

- Guideline on Open Biodiversity Data
- Guideline on Health Research Data

### **Content: National Guidelines for Open Science**

- 1. Introduction
- 2. Open Access to Scholarly Publications and Research Data
- 3. Infrastructure for Open Data Sharing
- 4. Incentives and Mandatory Rules on Open Science in Public Funded Research
- 5. Governance on Open Science in Public Funded Research
  - Roles and Responsibilities
  - Data Management in Open Science (DMP, Deposition, Re-use, etc.)
  - Ethics and Data Integrity
- 6. Implementation of Open Science in Public Funded Research

Next initiative for MOSP will be a research domain on indigenous knowledge
