Using Social Media Feather

The Social Media Feather plugin adds two additional widgets: “Follow Us,” for including links with social media icons, and “Sharing,” for ease in sharing WordPress content to different social networks.

Adding Social Media Feather

Go to the Dashboard → Plugins.

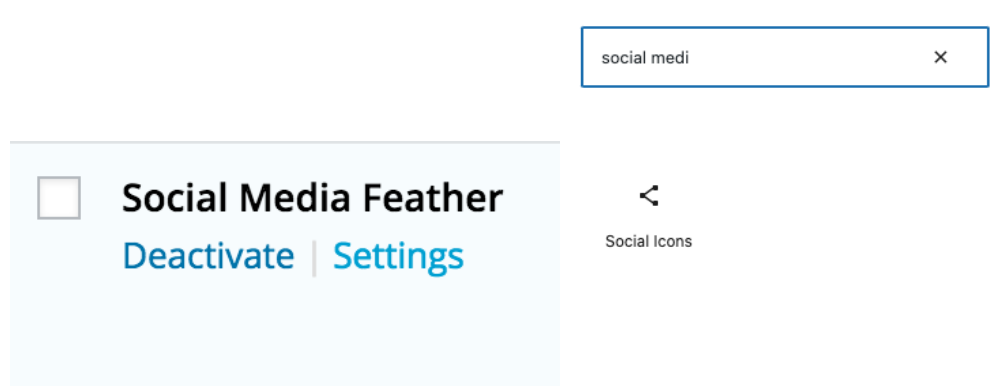

Search for “Social Media Feather” in the search bar.

Click “Activate” under the name of the plugin.

Configuring Social Media Feather

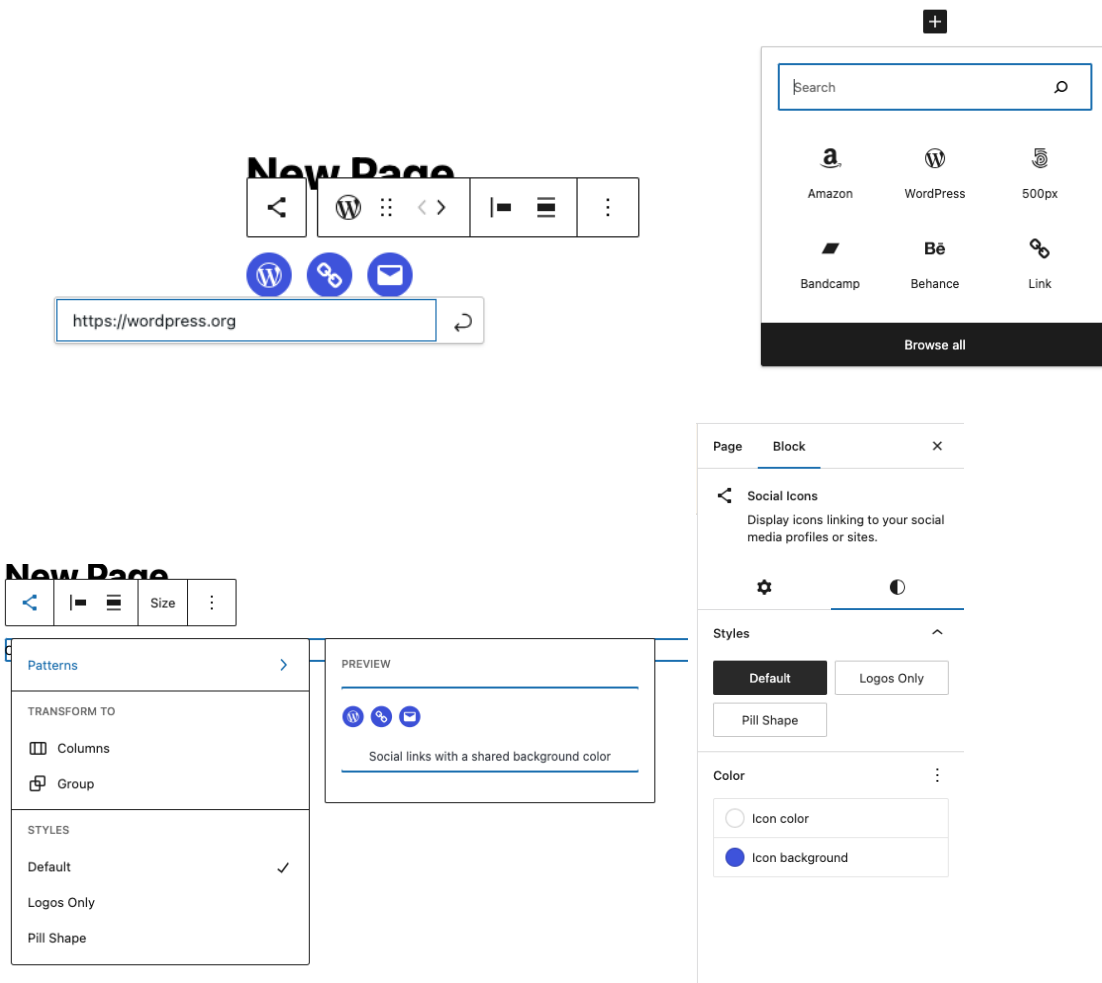

To configure Social Media Feather, access its settings through Dashboard → Site Name in the top left corner and find its entry. Click on the page you'd like to add the Social Media Feather to. Afterwards, hit “Edit” and the Blue plus button. Go to search “Social Media”

Selecting and Using Social Network Links

To change the social providers Social Media Feather uses, click the black plus after picking social icons. Through supplying relevant social media links, the Social Media Feather icon can be linked to different accounts. To customize the widgets you can click directly onto the links as well as change the link URLs or click the black plus button again to add new URLs

Enabling and Changing Social Network Links

For each social network provider in Social Media Feather, you may click on their logo and hit the icon you would like on your page:

- “Remove (link name)” will completely remove icon and its link
- “Lock” will keep the icon and link from moving and being removable

Once any changes have been made, click “Update” at the top right of the page to retain and publish those changes. All links
