

I Can Statements- Evolution

I Can:

- Relate steps in evolutionary theory and how they build to current understanding of evolution.
- Use Darwin's experiences in the Galapagos Islands to support views on natural selection.
- Explain how heritable traits are passed and the mechanisms for natural selection.
- Apply the idea of "Survival of the Fittest" appropriately.
- Explain adaptations organisms have based on characteristics of their environment.
- Use a variety of evidence pieces to support evolution of animals.
