

Photos from the Snow Canyon Petroglyphs and Slots Hike on April 19

We had a good turnout for the hike and of course the weather was excellent, the petroglyphs impressive and the vistas wonderful. It seems that everybody enjoyed themselves as we wandered around among the lava-splashed rocks from petroglyph site to petroglyph site in the Snow Canyon Wilderness portion of the state park. This is one of the finest concentrations of petroglyph sites in the area, and it did not disappoint... Click on the following links for photos. Enjoy!
