

Privacy Policy

Last updated: July 19, 2026

Introduction

This Privacy Policy explains how Tempo ("the app", "we") handles information when you use the app. By using Tempo, you accept the practices described in this document.

Data controller

The data controller is Tempo's developer. You can reach us at developerone939@gmail.com for any question about this policy.

Data we collect

Tempo does not collect, transmit, or share any personal data. The app works entirely offline: it requires no sign-up, no user account, and no login. Everything you enter (your goals, their progress, your app preferences, and your achievement stats) is stored only in your device's local storage and never leaves it.

System backup

If you have Android's automatic backup enabled, the operating system itself may include the app's local data in your Google backup. That process is handled by Google under its own privacy policy; Tempo has no part in it and no access to that backup.

Permissions and third parties

Tempo does not request location, camera, contacts, or any other sensitive device permission, contains no advertising, uses no analytics tools or third-party SDKs, and never connects to any server.

Children

Tempo is not specifically directed at children and does not collect data from any user, regardless of age.

Your rights

Since we never store any data outside your own device, you can erase all of the app's information at any time by uninstalling it or clearing its data from your operating system's settings. There is no need to ask us to access, correct, or delete data, because we never hold any.

Changes to this policy

We may update this Privacy Policy at any time to reflect changes to the app or for legal reasons. We will publish the updated version inside the app together with its last-updated date. Continued use of Tempo after a change means you accept the new policy.

Contact

If you have questions about this Privacy Policy, write to us at developerone939@gmail.com.
