QUESTION THE STATUS QUO

This is the place where we can write down the ideas shared by others at the [2014 Technology Leadership Symposium](#).

[Doodle.com](#) is an online scheduler. Here's [an infomercial made by Tony](#).

[Doctopus](#) sends copies of documents to students from the teacher's account. A big time saver! From a spreadsheet, there's a link to each student's assigned document. You have the ability to embargo and un-embargo when the document is available to students. You can transfer ownership of the documents to students.

[Doctopus + Classroom + Goobric = :\) - YouTube](#)

[Stoodle](#) Is a collaborative online whiteboard

[Goobric](#) is a Chrome extension that attaches a rubric to each student's document..

Cups with stickers with usernames and passwords. Can be stacked!

Use vertical files for storing Chromebooks.

Autocrat is a Google Sheets Add on that does automatic mail merges.

[Flooparoo](#) and [Doctopus](#) are add on for Google Sheets.

[WeLearned.it](#) for submitting work and grading it.

Got a cart of devices that aren't being used (or need to be plugged in because of bad batteries)? Divide them up into small class sets that are assigned to classrooms.

Learn new technology on [Lynda.com](#).

How you keep up with what's new in technology? Many of us use Twitter. To surface the best links shared by people you follow on Twitter, try linking your account to [Nuzzel](#).

[Cybraryman.com](#) is a site with updated pages about so many subjects.

[BrainPop](#) continues to be a favorite in classrooms. Teachers use the clickers to report responses to their online gradebooks.

[InfoOhio](#) is a great resource. New teachers need to learn about it and other need to be reminded that it's there.
