Comments / Feedback to improve your article/manuscript.

1. Please check all grammar and spelling.
2. Please update your references. Some references are too old.
3. Ensure your references are based on international references. All Indonesia references must be translated to English please.
4. Ensure having page number
5. Please check the author guideline
6. Please see attached the template of cover letter. You need this cover letter when you submit your paper through manuscript online.
7. In Emeraldinsight publisher – the abstract should follow structured abstract.
8. Please download at least 2 articles from journal that you are targeting to submit
9. Literature should have critical thinking. Some paragraphs do not have text references. Please check.
10. Please avoid long sentences, please avoid long paragraph.
11. When include all authors details in manuscript central, please ensure you include affiliation webmail or your affiliation email address (please do not use gmail or yahoo webmail).
12. Please read carefully when you submit the article. Follow the instruction.
13. Please ensure you have list of tables, list of figures and check number of words. Some journals do accept over limit word counts.
14. Check your title – to ensure do not have long title. Under emeraldinsight the maximum words for title not more than 20 words please
15. Keywords – for emeraldinisght not more than 6 keywords
16. When upload your document to online or manuscript central please check carefully. And ensure do not include your details in the document. Note: this is double blind peer reviewed process.
17. It is good that you have acknowledgement
18. Under introduction – please ensure you have background, rationale of the study, objective. For rationale of study – please have discussion on the previous studies and the study you are doing now. For instance – why you are choosing this topic?
19. Thinking about the contributions – contribution to the body of knowledge; contribution to practitioners
20. For Business Management/Accounting mostly journals they require the theoretical underpinning, for instance we are using RBV; TPB; Stakeholder Theory, Institutional Theory etc
21. Please ensure you have at least a half page conclusion.
22. In Methodology, please ensure you all follow the process of research method. Justify why you are selecting this method why not the other methods for example ?
23. If your paper has hypothesis development and a conceptual framework – then please ensure you justify for each hypothesis and then create a figure for a conceptual framework development. Ensure you have the arrows for each hypothesis. Usually for Q1 and Q2 – some journals they require the moderating variables, the models better having more complicated instead of simple models.
24. It is good to have peer to review and read your paper before submission
25. Under results and discussions – it is good idea to have literature to support your findings or results (in discussion section).

26. Some journals have further recommendation. If we download a couple new articles and they have further recommendation, it is good for us to get new topics for next research project
27. Please ensure you communicate with your all co-authors
28. For getting reviewers comments, the first thing is please create a new file – response to reviewers comments (please see example).
    It is good idea to create a table below:

No	Reviewer's comments	Response to reviewer comments
1.	……	Thank you for your valuable feedback. We have revised this in the paper. Please see the track changes version.
2.	…..	
3.	…..
