Book-bot list (Caveman, Impact, A Biz, IA)

Prepared 11 November 2026 (Africa/Johannesburg) for idea a2cb73d6 / Tango cd0b6d4c. This is a list only. No bots were renamed or created in this pass.

Trevor asked for a list of existing book-writing bots (ids and names) so he could rename or create **Book: Caveman**, **Book: Impact**, **Book: A Biz**, and **Book: IA**. Those four bots already exist. They were set up on 10 November 2026 with the New Book Bot Kit. This table is the current roster, checked against `/workspace/ops/book-bot-kit/MANIFEST.md` and the 10 November fleet census.

Spell it **Authority** when the word comes up. Never "AUTHORity."

The four book bots

Nearby, not one of the four

- **Love First** has a working Google Doc on the Hub under Books (doc), but the 10 November fleet census did not show a dedicated **Book: Love First** bot. No bot was created for it in this pass.
- Other Authority-related docs (title/TOC drafts, book picks, the AI Authority Advantage blueprint) live on the Hub under Books. They are documents, not bots.

What was not done

- No bots were renamed.
- No new bots were created.
- Sharing on the older planning and draft docs was not changed in this pass, except for the new docs created for the Alex Finn idea.
- The open Book: Caveman follow-up (cut questions from 5 to 3) was left as it was.
