

Refuge LARP Edmonton

LCS Species

Created April 16th 2023 by Josh Gilmour

The Refuge LARP Edmonton Chapter will be releasing LCS (Local Chapter Specific) Player Species choices during the 2023 season.

The LCS species available will be Revenant, Goblin, Dragonborn, Xanthomorphs, and Satyr. These species will not be available in the Refuge LARP database, but the write up for each LCS species will contain all the information needed to create a character using one of those five choices.

Please note that if you choose to play an LCS species and travel to another Chapter, your character's species will be what is officially listed in the database, and all original makeup and prosthetic requirements will be needed.

Revenant - A being stuck between the living and the dead

Goblin - Tinkerers, builders, and cousins of the Orcs

Satyr - Fae beings taking their first steps outside of their home forest

Dragonborn - The descendants of the first dragons of The Argent Veil

Xanthomorphs - Magical creations given the spark of life and sentience

If you have any questions on these LCS species, please contact the chapter owner at owner@refugelarpedmonton.ca
