

Position: Android Developer

About us:

Akvelon Inc (USA) works in the field of software engineering based on a variety of technologies. Our company is a member of the vendor program, which gives employees the opportunity to work with clients in the United States and other countries (**Microsoft, Facebook, Airbnb, Dropbox, Pinterest**, and many others). This is a great opportunity to transfer experience and experience with leading engineers of world-renowned companies.

About client:

American social news aggregation, content rating, and discussion website. Also called "The front page of the internet," it brings over 430 up million people together each month through their common interests, inviting them to share, vote, comment, and create across thousands of communities. Come for the cats, stay for the empathy.

Mobile users are more than half of Client's traffic, and we are looking to invest in innovation within the mobile app. We are looking to launch new products that will continue to bring conversation and community to hundreds of millions of users.

We're passionate about developing scalable, well-designed software that improves people's lives globally. Join us and help build the future of popular social network!

What We're Working On

- Driving new features from end-to-end through prototyping, validation, implementation, launch, and continuous iteration.
- Crafting a modern user experience for accessing content and communities.
- Building the technical foundation for future features and experiences.

What We Can Expect From You

- Expertise in Kotlin with 3+ years of experience within Android development.
- Sound software engineering fundamentals, knowledge in design patterns such as Coroutine.
- Embracing the challenges of building data intensive, highly responsive, and fault tolerant apps in the constrained environment of a smartphone.
- Willingness to buck trends and learn new ways to build software.
- Passion for developing scalable, well-designed software that improves people's lives globally.
- Experience building at least one amazing Android app with a team from start to shipment.

AKVELON

We Make Big Software Happen

- Experience with Dagger, Jetpack Compose, Room, Glide and other Android developing tools

Responsibilities:

- Build experiences and create the patterns for Client's official Android app that power localized experiences, help users engage with content, or deliver modern chat experiences.
- Partner across product, design, and engineering teams to innovate and implement sophisticated solutions to complex challenges.
- Participate in the full Android development cycle: design, develop, QA, experiment, analyze, and deploy.
- Be

We offer:

- Entering a professional level equivalent to world standards;
- High wages (we proceed from the wishes of the candidate and the level);
