dstack: Developer Advocate Intern (Munich or Remote/Europe)

About us

At [dstack](#), we're a Munich-based company dedicated to building a modern open-source stack for ML development. Our goal is to make ML development a joyful and cost-effective experience while following best engineering practices.

Who we are looking for

Currently, we're seeking a developer advocate intern who is passionate about both ML and open-source. This position is open to anyone with ML experience or any student currently studying ML.

Responsibility

As an intern, your main responsibility will be to enable the ML community to develop more efficiently by crafting tutorials, and documentation, and translating the needs of ML engineers to the engineering team.

Requirements

The ideal candidates should possess a genuine interest in ML and open-source technology, along with some practical experience in modern ML. Additionally, they should have a willingness to interact with the community.

Why join dstack?

Throughout your internship, you will have the opportunity to learn from and be guided by the founding team of dstack. This is an exceptional opportunity to work with a company that develops advanced open-source tools for ML engineers.

Location

The position can be either Munich-based or remote and is open to candidates based in Europe.

How to apply

Send a short email about yourself and your CV to hello@dstack.ai
