

01/12/2026: THIS DOC IS NO LONGER BEING UPDATED. Most likely you will not be able to find unblocked links, this is due to admins finding links in this doc. We have lots of new unblocked links for every blocker in discord.gg/unblocked !

Psst, a minecraft/eaglercraft server will be coming out soon -ajh

Endis / Vault

dsc.gg/endis for more links & the latest updates.

← Use tabs on the left to navigate.

Updates / Info

Introducing my new site, Endis. Check [AJH's Vault - Link Portal](#) for more info.

Join our server dsc.gg/endis for the latest updates and extra links!

Check out the BYOD Tutorial page to make your own links.

 **Make sure to bookmark this page and share with your friends (so that you don't lose access to other links (trust me, it has happened many times before to people))!**

Click on File > Download to save an offline copy of this doc to your chromebook/pc/ipad/etc. (since **google docs CAN get blocked**).

If you want to report an issue, email me at aj@ajh.college or join <https://discord.gg/RxDCZz7E5R>. I will *not* give editor access to this doc.

If you are a teacher coming here just to get everything blocked, **your students are responsible for themselves, their own education, and don't need a barrier.** Some students (and even teachers) use this site at appropriate times and/or to access classroom resources.

To be precautious, please be aware of impersonators. My only emails that I use are aidanjhnepik@gmail.com, ajh36@outlook.com, and aj@ajh.college **(please only message me on aj@ajh.college, im not responding to messages on other emails.)**

If a kid at your school is saying they're me, they're not 🦴

My only Discord that I communicate with is @clubajh and my only email I communicate with is aj@ajh.college.

If this google doc ever gets blocked for you, I have the list of all FreeDNS links readily available. You can access it through any preexisting unblocked link, and appending message.txt.

For example, if you are at endis.org/#, you would go to endis.org/message.txt.

I eternally appreciate everyone's support! 🧡

★ How to Make Your Own CBMagic Link Using FreeDNS

Want a custom URL you can bookmark or share? Here's the simple way to do it.

◆ Step 1: Sign Up on FreeDNS

1. Go to freedns.afraid.org
 2. Click **Sign Up**
 3. Make your account and verify your email
 - If your school blocks email verification, use a temporary email via the CBMagic proxy (e.g., 10minutemail.com).
-

◆ Step 2: Create Your Custom Link

1. Log in and click **Subdomains** in the top menu
2. Click **+ Add**
3. Pick a domain from the dropdown
4. Type your custom name (your subdomain)
5. Click **Save/Add**

Your link will look like:

yourname.chosen-domain.tld

◆ Step 3: Point It to CBMagic

1. Find your new subdomain and click **Edit**
 2. Change the **Type** to **A**
 3. Set the IP to:
144.217.77.9
*(Or use a CNAME pointing to **server.ajh.wtf**)*
 4. Save your changes
-

◆ Step 4: Wait for DNS to Update

This usually takes a **few minutes** (sometimes up to an hour).
Once it updates, visiting your custom link will bring you straight to CBMagic.

◆ Step 5: Use & Share Your Link

- **Bookmark** it for quick access
 - **Share** it with your friends — flex your custom CBMagic link 😎
-

Quick Summary

What You Did	Why It Matters
Created a FreeDNS account	So you can manage custom domains
Made a subdomain	Gives you a unique personal link
Pointed it to 144.217.77.9	Connects your URL to CBMagic

Have fun with your new link twin 

And don't forget to share this guide so your friends can make theirs too!!!!!!!!!!!!!!!!!!!!

How to Make Your Own Link for Vault Using FreeDNS

What this means:

You'll get your very own web address that points to the Vault V9 website — so you can share or bookmark it easily!

Step 1: Sign up at FreeDNS

1. Go to <https://freedns.afraid.org/>
2. Click **Sign Up** and create your free account
3. Confirm your email and log in

Note: some Google Workspace organizations (your school/district) blocks outside mail. You can use the proxy on Vault to access a temp mail site (like <https://10minutemail.com>) to generate an email that you can verify with (and also continue to make new accounts, since you are limited to 5 links per account).

Step 2: Create your custom link (subdomain)

1. After logging in, click **Subdomains** on the top menu
2. Click the + **Add** button to add a new subdomain
3. In the dropdown, pick a domain
4. Type your custom name in the subdomain box
5. Click **Save** or **Add**

Your new web address will look like:

SUBDOMAIN.DOMAIN.TLD

Step 3: Point your link to Vault 's IP (A record)

1. Find your new subdomain in the list and click **Edit**
 2. Set the record type to **A**
 3. Enter this IP address:
167.86.103.140
 4. Save your changes
-

Step 4: Wait a few minutes

DNS changes take a little time (usually a few minutes to an hour) to update. When ready, your new link will take you to Vault !

Try typing your new link into your browser. You should see the Vault website.

Step 5: Use and share your new link

- Bookmark your new link so you can visit Vault quickly
 - Share it with friends to show off your personal Vault link!
-

Summary

What You Did	Why It Matters
Created a free account on FreeDNS	To manage your custom domain/subdomain
Made a subdomain (your own custom name)	So you have a unique web address
Pointed it to 167.86.103.140 with an A record	Connects your link directly to Vault

Have fun with your new links twin 

Make sure to share this with your friends so that they can make links too!

Official v7

But pls, you dont need to use v6.5, the only case really is if your school uses securly, otherwise it's best to switch to v9.

FAQ

Q: Why does it say “this file looks suspicious”

A: google just thinks that all the links on here is a scam, you can ignore it

Q: the movies dont work

A: use the sources button at the top left. It’s a bit small of a button but eventually there is a working source, it may take a dozen to find one though that works for you.

Q: the proxy/apps dont work

A: make sure you are using chrome, otherwise they will not work (since the apps are proxied). I am tryna find a fix for this though.

Update: right now, only games work due to UV breaking, but the proxy is being upgraded at the moment. Sorry for the inconvenience!

Q: can i link leak

A: absolutely, it’s not a problem to me, and you can also add these links on your own docs and whatnot, however please dont sell links to my site unless you plan on paying me as well bruh

Q: im not trying to make links myself, can u make links for me

A: I now have a Ko-Fi, with memberships and a shop: <https://ko-fi.com/ajhsvault>

Q: does this work on college board/otus browser

A: yes, anything that is just a webview will work
