2014 Conservation

Contract Building Activity

As a class, we are going to build a set of expectations for everyone participating in the Senior Project course. This will be accomplished by doing the following:

- Separate into groups of three or four
- Write down 3-5 expectations for each topic below
- Groups will share out their expectations for each topic
    - After sharing, the class will discuss the expectations and vote to accept or decline them
- Once all expectations have been shared and voted on, we will combine all expectations into this document
- This expectations document will be digitally signed by everyone in the class

Course Expectations
