# Feeding Infants

## *Sample Quiz Questions*

1. Choose the best response: Hunger cues in an infant include:
  - a. Opening and closing the mouth
  - b. Rooting
  - c. Bringing hands to face
  - d. Making sucking sounds
  - e. All of the above
2. **True** or False: An infant should be fed only breast milk or infant formula exclusively from birth through about 6 months of age.
3. **True** or False: If an infant is fed another infant's breast milk, you should notify both families of the mix-up and reassure families that the chance of infectious disease transmission is small.
4. Fill in the blank: How long can you keep a bottle that was started by an infant without refrigeration? **One hour**
5. Fill in the blank: What is the best method of bottle feeding? **Paced bottle feeding**
6. Choose the best response: One important indicator that a infant is ready for solid food is when:
  - a. The infant is at least 4 months old
  - b. The infant cried a lot
  - c. Whenever the family thinks it is time
  - d. The infant can hold their head up on their own and push food to the back of the mouth to swallow
7. Fill in the blank: An infant only needs **1-2** tablespoons of food when they are first introduced to food.
8. True or **False**: Food should be mixed so that a infant will more readily accept a new food.
9. **True** or False: Infants may be ready to drink from a cup when they can sit on their own and seal their lower lip around the rim of the cup.
10. True or **False**: You should teach an infant to drink from a sippy cup.
