

FOREWORD

The Democratic Party serves as the organ of advancement in America. That is the goal of the Democratic Party, and it always will be. The plan in Atlantic is to advance all Americans and create a new America, free from the oppression that the GQP has continued to institute since they evolved from the Republicans of Abraham Lincoln and forsaken his values. This has led to all conflicts, cultural, political, and all other conflicts that have been witnessed in the course of American history. The Democratic Party is divided into many functional branches, creating the apparatus for spreading the Democratic Ideal. However, the current way the Democratic Party operates within the broad-left ideology is simply not working for Atlantic, visible through our repeated failures in the voting booth. From the Governorship to Senate races, the apparatus must be fundamentally changed. This is why I, Daco, am proposing a new syncretized ideology to fight against the GQP, the DINO's, the reactionaries, the centrists, and the independents.

The goal of this ideology lies in promoting mass action, smashing oppressive institutions within Atlantic, tearing down the continually entrenching GQP administration, reorganizing the citizens of the state to create industry, become a shining beacon in the state, and creating a Dacoist rule that can treat citizens from Maine to Pennsylvania fairly. Some of this must be done within the State apparatus, but eventually our needs will exceed its usefulness, at which point it should be promptly discarded. When this comes to pass, the state apparatus will reveal its uselessness by opposing us. However, in the course of events that will need to occur before Dacoism can become the dominant ideology among Atlanteans, all who follow Dacoism must follow Dacoism completely and totally. There can be no room for reducing it, liberalizing it, or reforming it in any way. Any sort of revision of the ideology that has been so carefully syncretized will push everything out of balance and obliterate the credibility Dacoism has.

Thus, this book has been made for the purpose of laying out exactly what Dacoism is. We must present as unified, complete, and internally resolved to all the opponents that do not yet understand why we are fighting for Dacoism. When the current apparatus has been obliterated and the new one built, then the time can come for reinterpreting and revising the details to create more effective policy. The goal of this stage is to carefully balance ideas to create the best society for all Atlanteans. Once a model that can prove Dacoism has been established in Atlantic, we can start exporting it to the other states and eventually other countries until there is a worldwide specter of Dacoism. Only then will the model be proven in full. The roadmap to Dacoism will be a long, troublesome one, but once it has been achieved there will be an ideal society. The roadmap to this goal will be laid below in future releases.
