Abstract:

- a. Background of the research
- b. Methods used
- c. Main results
- d. Conclusions

Keywords

Introduction:

- a. Background and context of the research
- b. Problem to be solved
- c. Research objectives
- d. Research questions or hypotheses
- e. Scope and limitations of the research
- f. Research contributions
- g. Article structure

Method:

- a. Research design
- b. Sample or data selection
- c. Tools and technology used
- d. Data collection process
- e. Data analysis methods

Result and Discussion:

Result

- a. Description of the data processing results
- b. Visualization of the results (tables, graphs, or images)
- c. Interpretation of the results
- d. Significant findings

Discussion

- a. Interpretation and evaluation of the results
- b. Relationship between the research results and previous research or theory
- c. Practical implications of the research results
- d. Limitations of the research
- e. Recommendations for further research

Conclusion:

- a. Summary of the results and discussions
- b. Answers to research questions or hypotheses
- c. Research contributions
- d. Recommendations for further research or practice

Acknowledgments:

- a. Thanks to those who supported the research

References:

- a. List of sources used in the research, including journals, books, conferences, and websites, arranged according to the IEEE citation style
- b. **Refer to at least 25 English-language references, ensuring that 80% of the cited articles are published in globally reputable journals or indexed in renowned academic databases.**
