Contact between humans and wildlife grows daily as humans expand into or destroy wildlife habitats, and major storms or fires displace animals in their ever-limited natural world. Nonviolent Communication (NVC), 09:45- 11:00. This is an interactive and experiential training session where people learn and practice a specific communication framework. Rather than a lecture, the workshop is an immersive, hands-on learning environment focused on building empathy and creating compassionate, honest connections with others. The workshop's foundation is built on the "four components" of NVC, which participants explore through discussion and practice. Observations: Learning to describe what is happening factually without adding judgment or evaluation. Feelings: Connecting to and expressing your own feelings, while taking responsibility for them. Needs: Identifying the universal human needs that are the source of your feelings. Requests: Making clear, specific requests for actions that could help meet your needs. **Elle Long** will lead this workshop. **Limit 20.**
