5. Pro Video Subtiter (worth \$397)

Research shows that subtitled videos on social media get significantly higher engagement than videos without subtitles. This editor allows you to auto-generate subtitles and add them to the video directly so that the subtitles will not be lost no matter what platform the video gets shared.

It also allows creators to adjust the font, size, color, and position of the subtitles as well. You can make the subtitles appear higher or lower on your video, or even resize your video so that the subtitles fit exactly where you need them.
