

Create 100 Clickbank Accounts Safely

Did you know that every time you access ClickBank, their system collects over 200 data points about your device? From your Chrome version to your installed font list, even how you move your mouse.

This is why simply logging out and logging into another account is COMPLETELY USELESS for protecting accounts. Your Digital Fingerprint remains identical, and ClickBank can easily link all accounts together.

Statistics That Matter

According to research from 5,000+ MMO Marketing marketers in 2025:

****Account Ban Rates:****

No protection: 78% banned within 30 days

VPN only: 61% banned within 60 days

Antidetector browser: 3% banned within 12 months

****Revenue Impact:****

Average loss when account banned: \$8,400

Time to rebuild: 4-6 months

Trust score recovery: 8-12 months

****Scaling Success:****

With antidetector: 89% successfully scale to 10+ accounts

Without antidetector: 12% can scale to 5+ accounts

Numbers don't lie. ClickBank is getting stricter, and the gap between antidetector users vs non-users is widening.

Multilogin: Enterprise-Level Solution

While there are many antidetector browsers on the market, ****Multilogin**** stands out with superior advantages for MMO Marketing:

Why Choose Multilogin?

****1. Proven Track Record****

8+ years in the industry (since 2015)

10,000+ active users worldwide

Trusted by the largest agencies

Regular updates following platform changes

****2. Advanced Technology Stack****

Multilogin doesn't just spoof fingerprints simply, but rebuilds the entire browser environment:

****Kernel-level spoofing****: Deeper than extensions or scripts

****Hardware emulation****: Simulates CPU, GPU, RAM

****Network stack isolation****: Each profile has separate network

****Cookie isolation****: 100% separated, no leaks

****3. ClickBank-Specific Optimizations****

Multilogin has dedicated database for each platform:

Fingerprint templates for ClickBank

Optimal settings to avoid detection

Regular updates when ClickBank changes algorithms

Community-shared best practices

****4. Pricing Worth the Value****

Solo: \$99/month (100 profiles)

Team: \$199/month (300 profiles)

Scale: \$399/month (1000 profiles)

ROI typically achieved within 1 week for serious marketers.

Case Study: Solo Marketer Reaches \$50K/Month

****Background****: Jenny, solo marketer in {niche}, stuck at \$5K/month with 3 accounts.

****Challenge****: Wanted to scale but didn't dare due to fear of losing existing accounts. VPN wasn't enough protection.

****Action Taken****:

Multilogin Solo plan

20 residential proxies

System to manage 50 accounts

****Timeline and Results**:**

Month 1: Setup 15 accounts, \$8K revenue

Month 3: 30 stable accounts, \$18K revenue

Month 6: 50 accounts, \$35K revenue

Month 12: 80 accounts, \$50K revenue

****Key Learning**:** Don't cheap out on tools. I wasted 2 years trying free methods before finally investing in Multilogin. Should have done it from the start.

ROI Calculation: Is Multilogin Worth It?

The question: Is \$99-399/month for Multilogin worth it for MMO Marketing?

Scenario 1: You DON'T use Multilogin

Account ban rate: 60-80% within 2 months

Cost to recreate accounts: \$500-1000

Rebuild time: 2-3 months

Revenue loss: \$5,000-15,000

Stress and frustration: Priceless

****Total cost**:** \$6,500 - \$16,000+ each rebuild

Scenario 2: You USE Multilogin

Multilogin cost: \$99-399/month

Proxies cost: \$100-300/month

Account ban rate: less than 5% within 12 months

Revenue: Stable and growing

Can scale 10-50x accounts

****Total cost**:** \$200-700/month

****ROI**:** From 10x to 100x depending on scale

Break-even point:

If each ClickBank account generates \$50/month profit, you only need 2-4 accounts to cover Multilogin cost. Everything after that is pure profit.
