Session 2

Empatico

Empatico , an initiative of The KIND Foundation, is 3
a free tool for educators to connect their classrooms with others around the world. Educators do this through a combination of live video and activities designed to foster meaningful connections among students ages 7-11. Empatico empowers educators and students to explore the world through experiences that spark curiosity, kindness, and empathy. Empatico was named a Fast Company 2018 World Changing Idea .

Problem solving and empathy are the 2 driving forces behind this website.

Global Collab- where can you get started?

If you want your class to get connected to other classrooms around the world and do not know where to start then sign up to Empatico and they will match you with a class in your time zone.Let the connecting begin. Did I mention it is free! Click here

to sign up. This platform allows you to connect with classes that are matched to you by the platform based on the same time zones.
Meet students from other countries and make your learning fun. Please note that for now it is aimed at primary school learners but they are working on the high school version.
