

Summary of Work Done by Each Team Member

Member	Work
Abdulkadir Elmacı	<ul style="list-style-type: none">• Attending most weekly and all assistant meetings• Researching previous years repos• Discovering GitHub repositories• Creating personal wiki page• Learning about Git• Requirements elicitation• Creating glossary• Reviewing requirements after customer meeting• Creating user scenario• Creating user mockups• Taking notes for meeting #5• Determining class diagram components• Drawing class diagram components• Updating class diagrams based on TA's feedback• Determining sequence diagram components• Drawing some of the sequence diagram components• Creating RAM for the the task done until Milestone #1• Writing future plans for Backend
Yağız Efe Şabanoğlu	<ul style="list-style-type: none">• Attending weekly and assistant meetings• Writing weekly efforts for my Personal Efforts Page• Creating a Personal Wiki Page• Analyzing previous groups' repositories• Researching platforms similar to our projects and adding them into github• Creating table and preparing template of research of similar project page• Review the admin scenario and suggest edits.• Preparing the mockup for the Admin Scenario• Meeting with the customer• Researching the class and sequence diagram.• Determining class diagram components and drawing three about controllers• Determining sequence diagram components and drawing cases

	<p>8-11 and 12.</p> <ul style="list-style-type: none"> • Modifying the class diagram to draw the sequence diagram. • Preparing a project plan for the part of the 352 course covered so far. • Updating the project plan for the prepared future plan.
Erecan Uysal	<ul style="list-style-type: none"> • Attending all weekly and assistant meetings • Creating README page • Examine previous years groups' repositories • Creating personal wiki page • Examine several github repositories and document favorite one • Doing research about git • Finding customer questions • Attending customer meeting • Documenting meeting notes for meeting #4 and #9 • Create user scenarios • Create mockups for user scenarios in android • Determining the Use Case Diagram components • Drawing the Use Case Diagram • Modifying Use Case Diagram based on assistant's feedback • Determining classes for Class Diagram and relationships between classes • Writing the executive summary for the Milestone Report 1 (contents and description parts) • Writing a future project plan for frontend part • Writing weekly efforts to github
Hamza Akyıldız	<ul style="list-style-type: none"> • Preparing Communication Plan • Discovering GitHub repositories • Creating Slack workspace • Requirements elicitation • Creating a glossary • Creating Admin user scenario • Taking meeting notes • Meeting with the customer • Determining use cases and drawing use case diagram • Determining sequence diagrams and drawing three of them • Reviewing and updating the requirements before first milestone

	<p>report</p> <ul style="list-style-type: none"> • Reporting the evaluation of the tools and processes • Planning the upcoming backend design and implementation
İsmail Ata İnan	<ul style="list-style-type: none"> • Attending all our weekly group meetings • Attending all meetings with the assistant • Creating the Wiki Home Page, Sidebar and Footer for our Github repository • Creating a personal Wiki page • Looking at several Github repositories and explaining one at Wiki • Doing a research about Git • Determining the format and the specification of the Requirements and listing them in the repository • Communicating with the assistant whenever we had questions • Inviting the assistant to our Slack channel • Reviewing and modifying the Requirements after feedbacks • Attending to the customer meeting • Writing the Guest user scenario • Preparing the mockup for the Guest user scenario using the mobile application • Documenting the meeting notes for Week 4 • Determining the Use Case Diagram components • Drawing the Use Case Diagram • Modifying Use Case Diagram based on assistant's feedback • Determining the key use cases for Sequence Diagrams • Drawing 4 Sequence Diagrams • Writing the executive summary for the Milestone Report 1 • Writing a project plan for the rest of the 352 course.
Merve Rabia Barın	<ul style="list-style-type: none"> • Attending all weekly and assistant meetings • Preparing a Meeting Notes Template • Discovering a Github repository and summarize it • Creating a Personal Wiki page • Contributing to the specification of

	<p>requirements</p> <ul style="list-style-type: none"> ● Contributing to the creation of User Scenario including persona, story, goals and acceptance criteria. ● Creating Web Mockups for Sharing and Editing Story pages. ● Attending Customer Meeting ● Determining use cases for Use Case Diagram ● Modifying Use Case Diagram based on assistant's feedback ● Determining classes for Class Diagram and relationships between classes ● Listing deliverables and their status, also evaluating the status of each deliverable for the first Milestone Report ● Writing a project plan for the rest of the 352 course.
<p>Onur Can Avcı</p>	<ul style="list-style-type: none"> ● Attending all weekly and assistant meetings ● Attending all meetings with the assistant ● Examining previous groups' repositories ● Connect Github Repo with Slack ● Creating a personal wiki page ● Discovering a Github repository and summarize it ● Creating table and prepare template of research of related project page ● Creating a team in Figma for simultaneously develop ● Writing the Guest user scenario ● Making research about mockups ● Preparing the mockup for the Guest user scenario using the mobile application ● Determining the Use Case Diagram components ● Drawing the Use Case Diagram ● Modifying Use Case Diagram based on assistant's feedback ● Determining the key use cases for Sequence Diagrams ● Drawing 3 Sequence Diagrams ● Reviewing listing deliverables and status ● Filling project plan ● Creating future plan for mobile and front-end

<p>Ramazan Bulut</p>	<ul style="list-style-type: none"> ● Attending our weekly meetings ● Attending meetings with the responsible assistant ● Examining old repositories prepared by previous years' groups ● Wiki Page designing ● Creating personal Wiki Page ● Git Version Control System research and documenting it as a cheatsheet ● Discovering Git repositories ● Documenting personal effort weekly ● Making pre-meeting research about week's task ● Communicating with group members about implementation process ● Documenting and clarifying question to be asked to the customer ● Research on how mockups should be according to requirements and scenario ● Preparing a admin web page template and creating some pages ● Determining classes by checking their requirements ● Creating 2 classes on diagram and attending a connection meeting ● Reviewing other class diagrams created by other members ● Determining and creating sequence diagrams ● Facilitating communication between class and sequence diagram groups ● Creating RAM table and filling it ● Creating future plan for mobile and front-end
<p>Umut Kocasari</p>	<ul style="list-style-type: none"> ● Attending all our weekly and review meetings ● Attending all the meetings done with the assistant ● Examining previous years' repositories ● Creating a personal wiki page ● Creating a template for personal efforts ● Making git research and summarizing it with explanations and images ● Discovering Github repositories and summarizing one of them ● Communicating with the team about what I have done and how the

	<p>progress is</p> <ul style="list-style-type: none">• Understanding the project and preparing questions• Asking questions to the assistant during meeting and saving the answers• Updating the questions page according to the answers• Making research about mockups• Creating a scenario for guest in website• Preparing the mockup for guest at website• Helping the team in use case diagram preparation• Modifying Use Case Diagram based on assistant's feedback• Determining classes for Class Diagram and dividing them between each other• Doing my personal part of Class Diagram• Combining classes with appropriate relationships• Reviewing what other team members have done about Sequence Diagram• Creating title page of milestone report• Combining all the markdown files in an appropriate format for milestone report with the table of content and title page and doing this in an automatic way• Planning the backend for future work with the backend team
